

Optical Illusions

What?? Your mind influences what you see? No way!

You don't believe me, do you? Maybe one of these **optical illusions** will convince you!

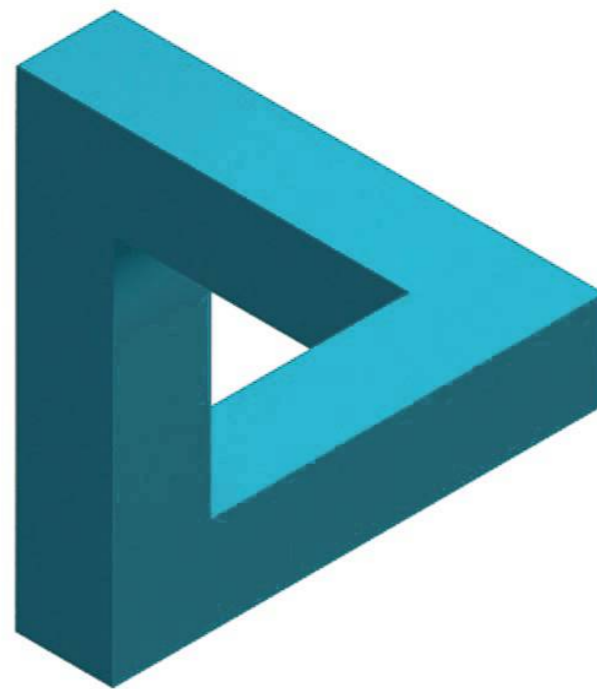

By Ethan

Focus on the blue dot.

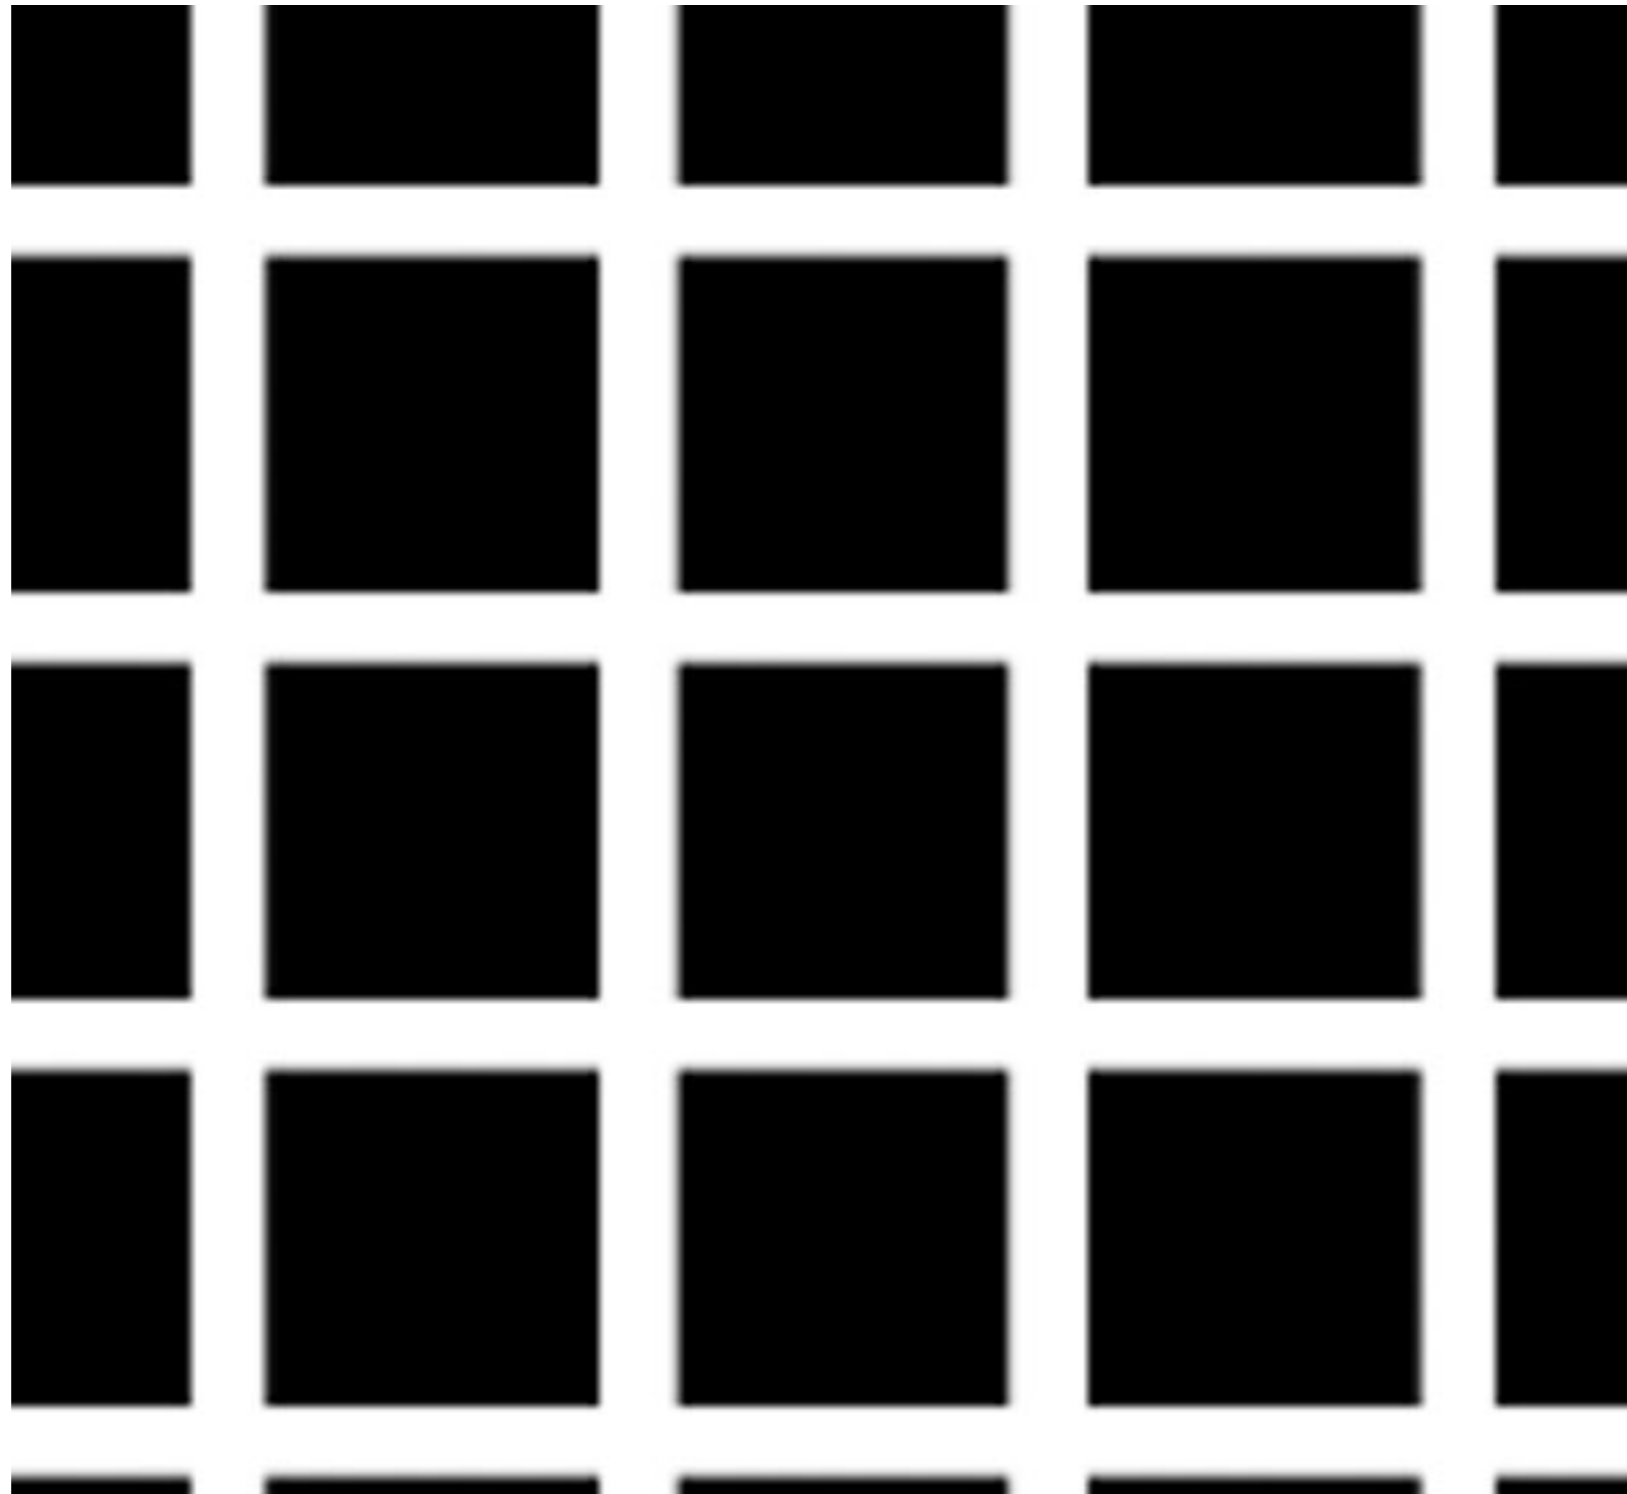

What happens?

Look at the triangle closely.

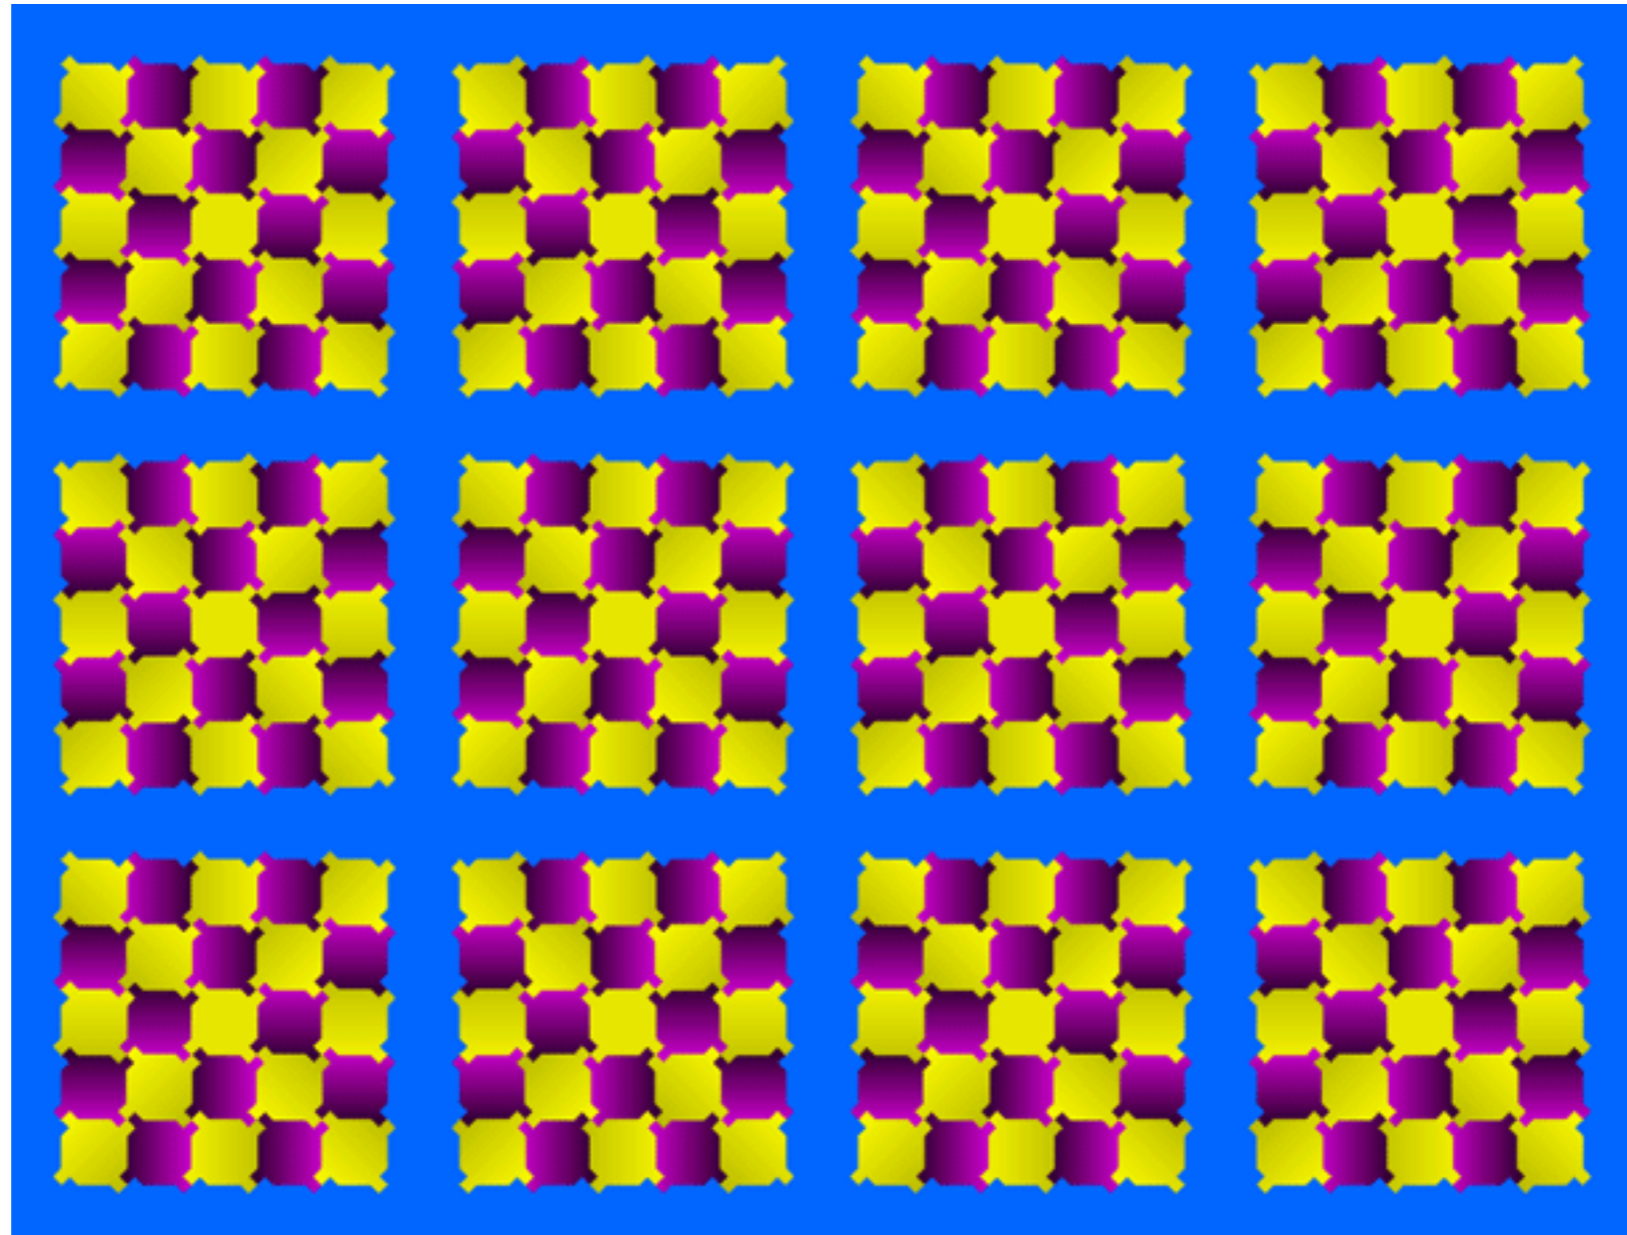

Isn't it weird?

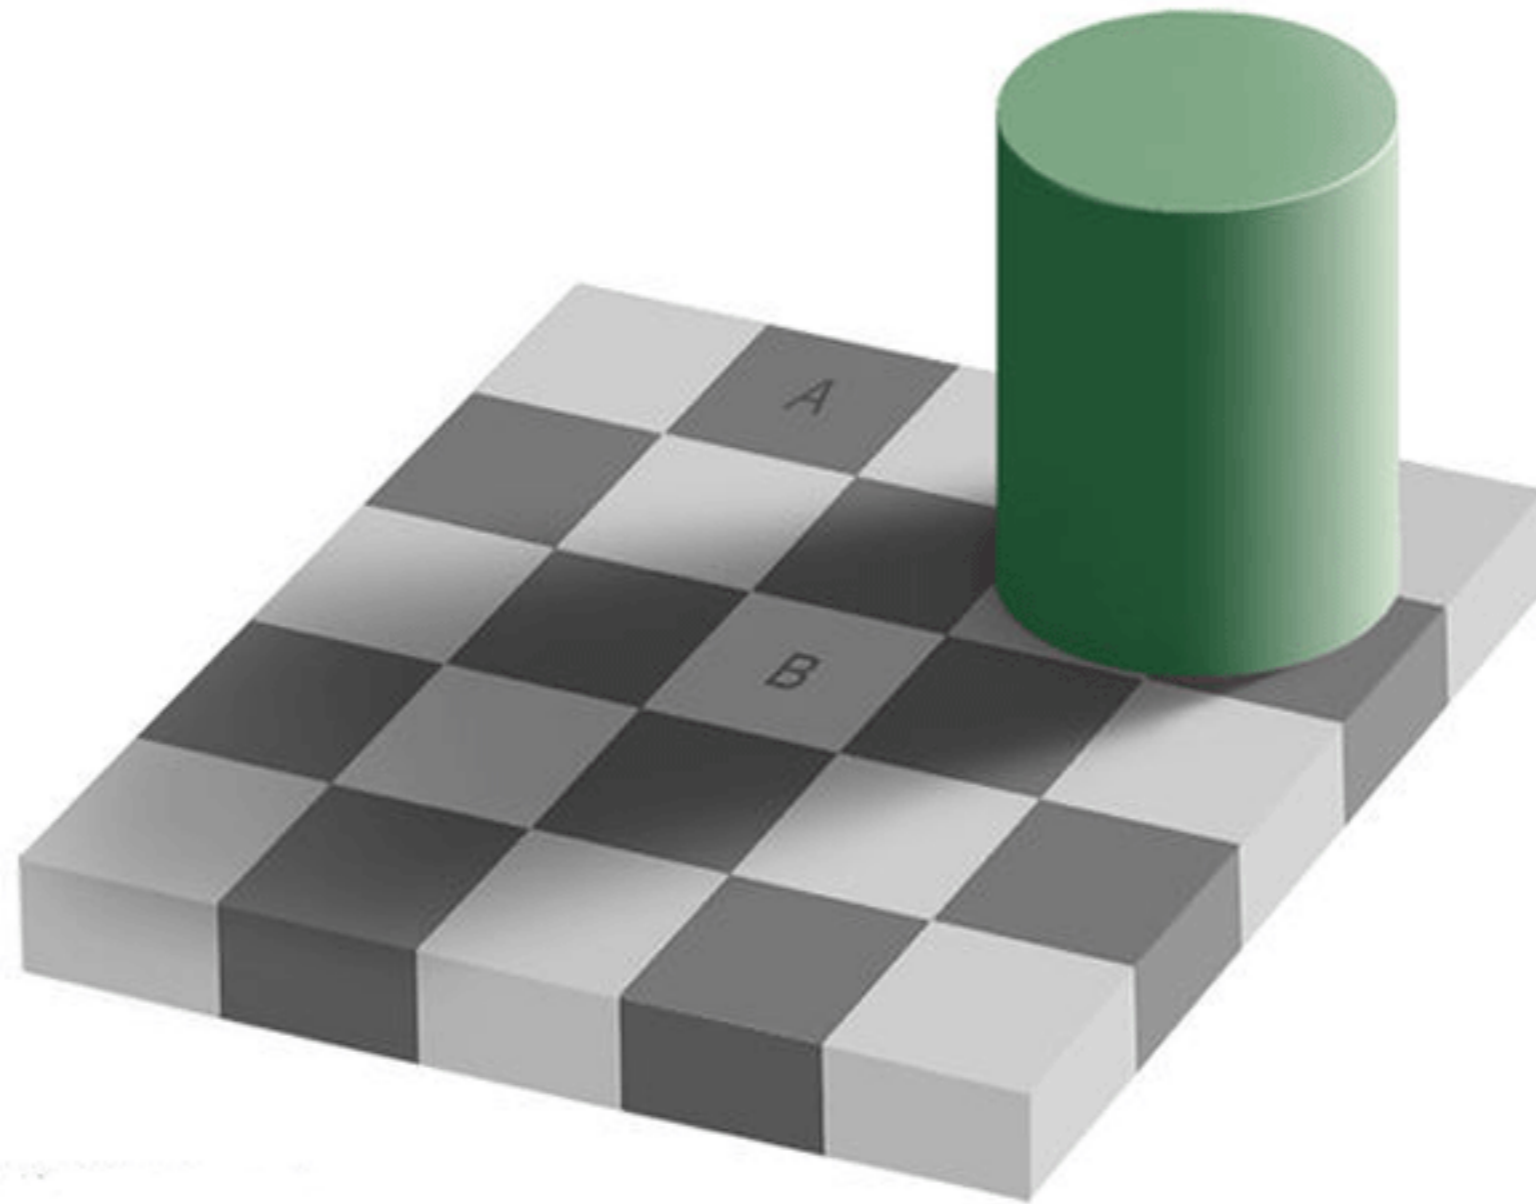

Do you see gray spots?

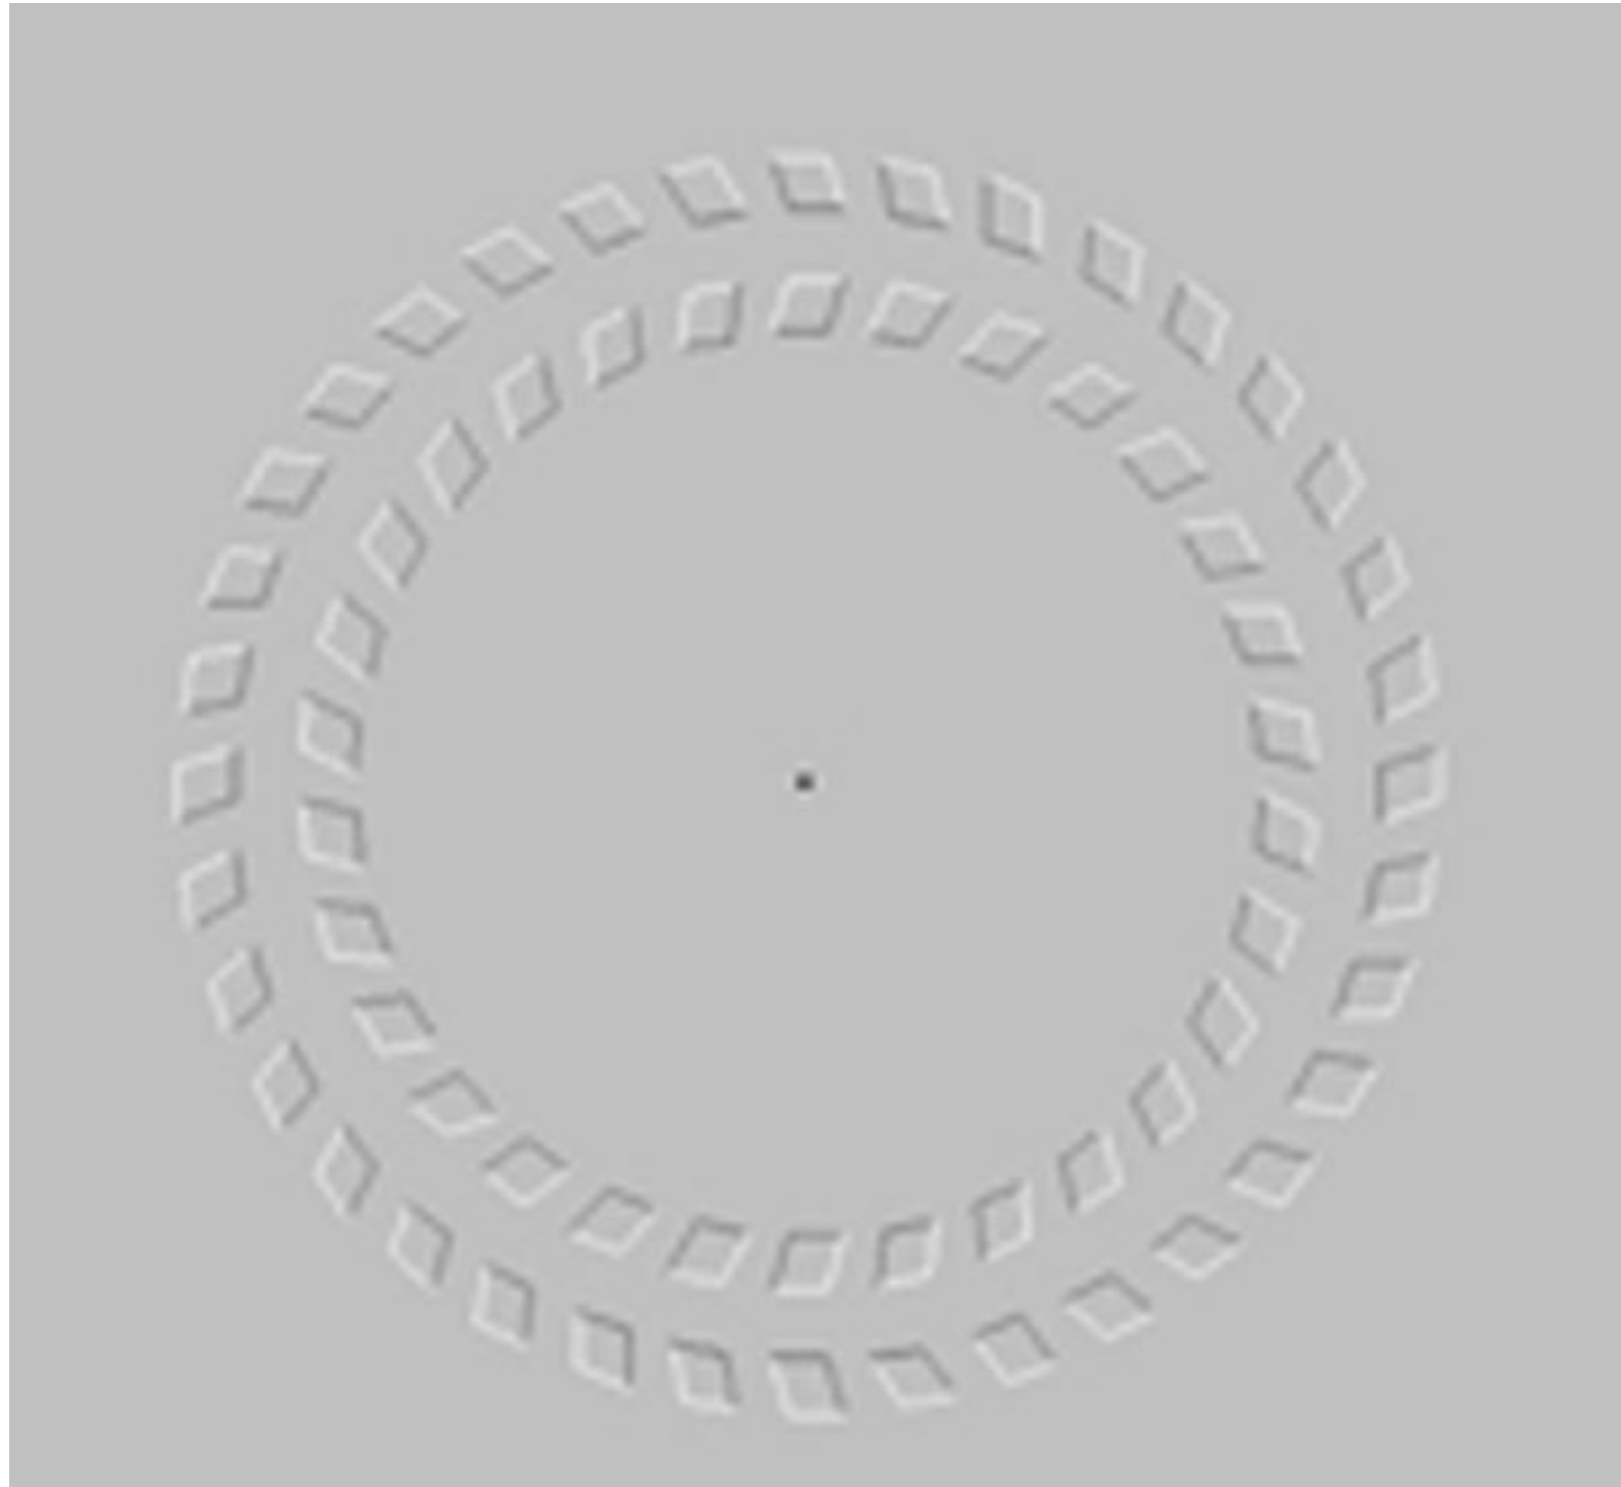

Are these boxes moving?

A and b are the same colour!

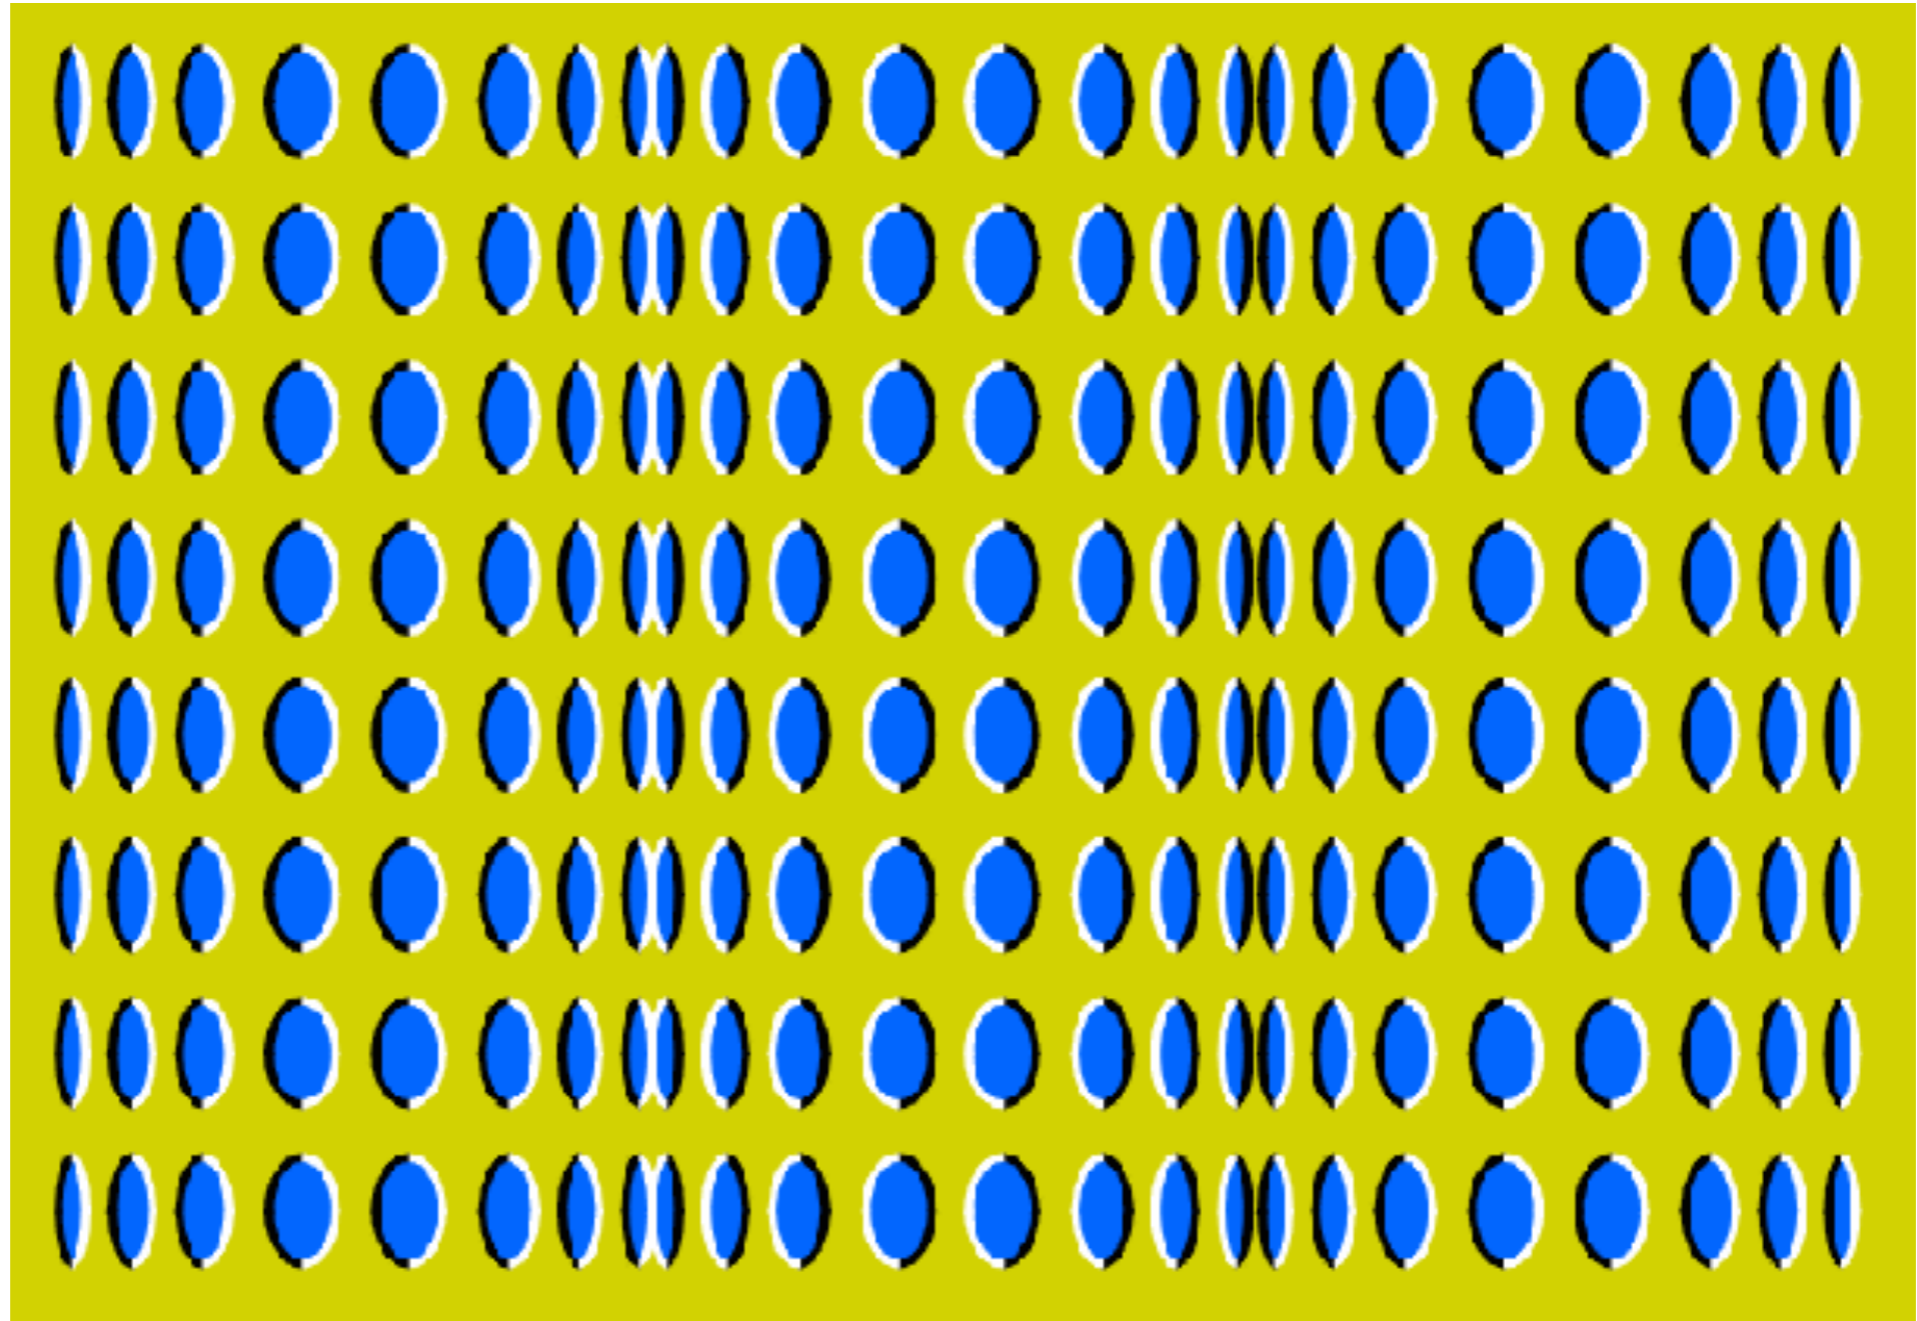

stare at the dot.
Are the circles moving?

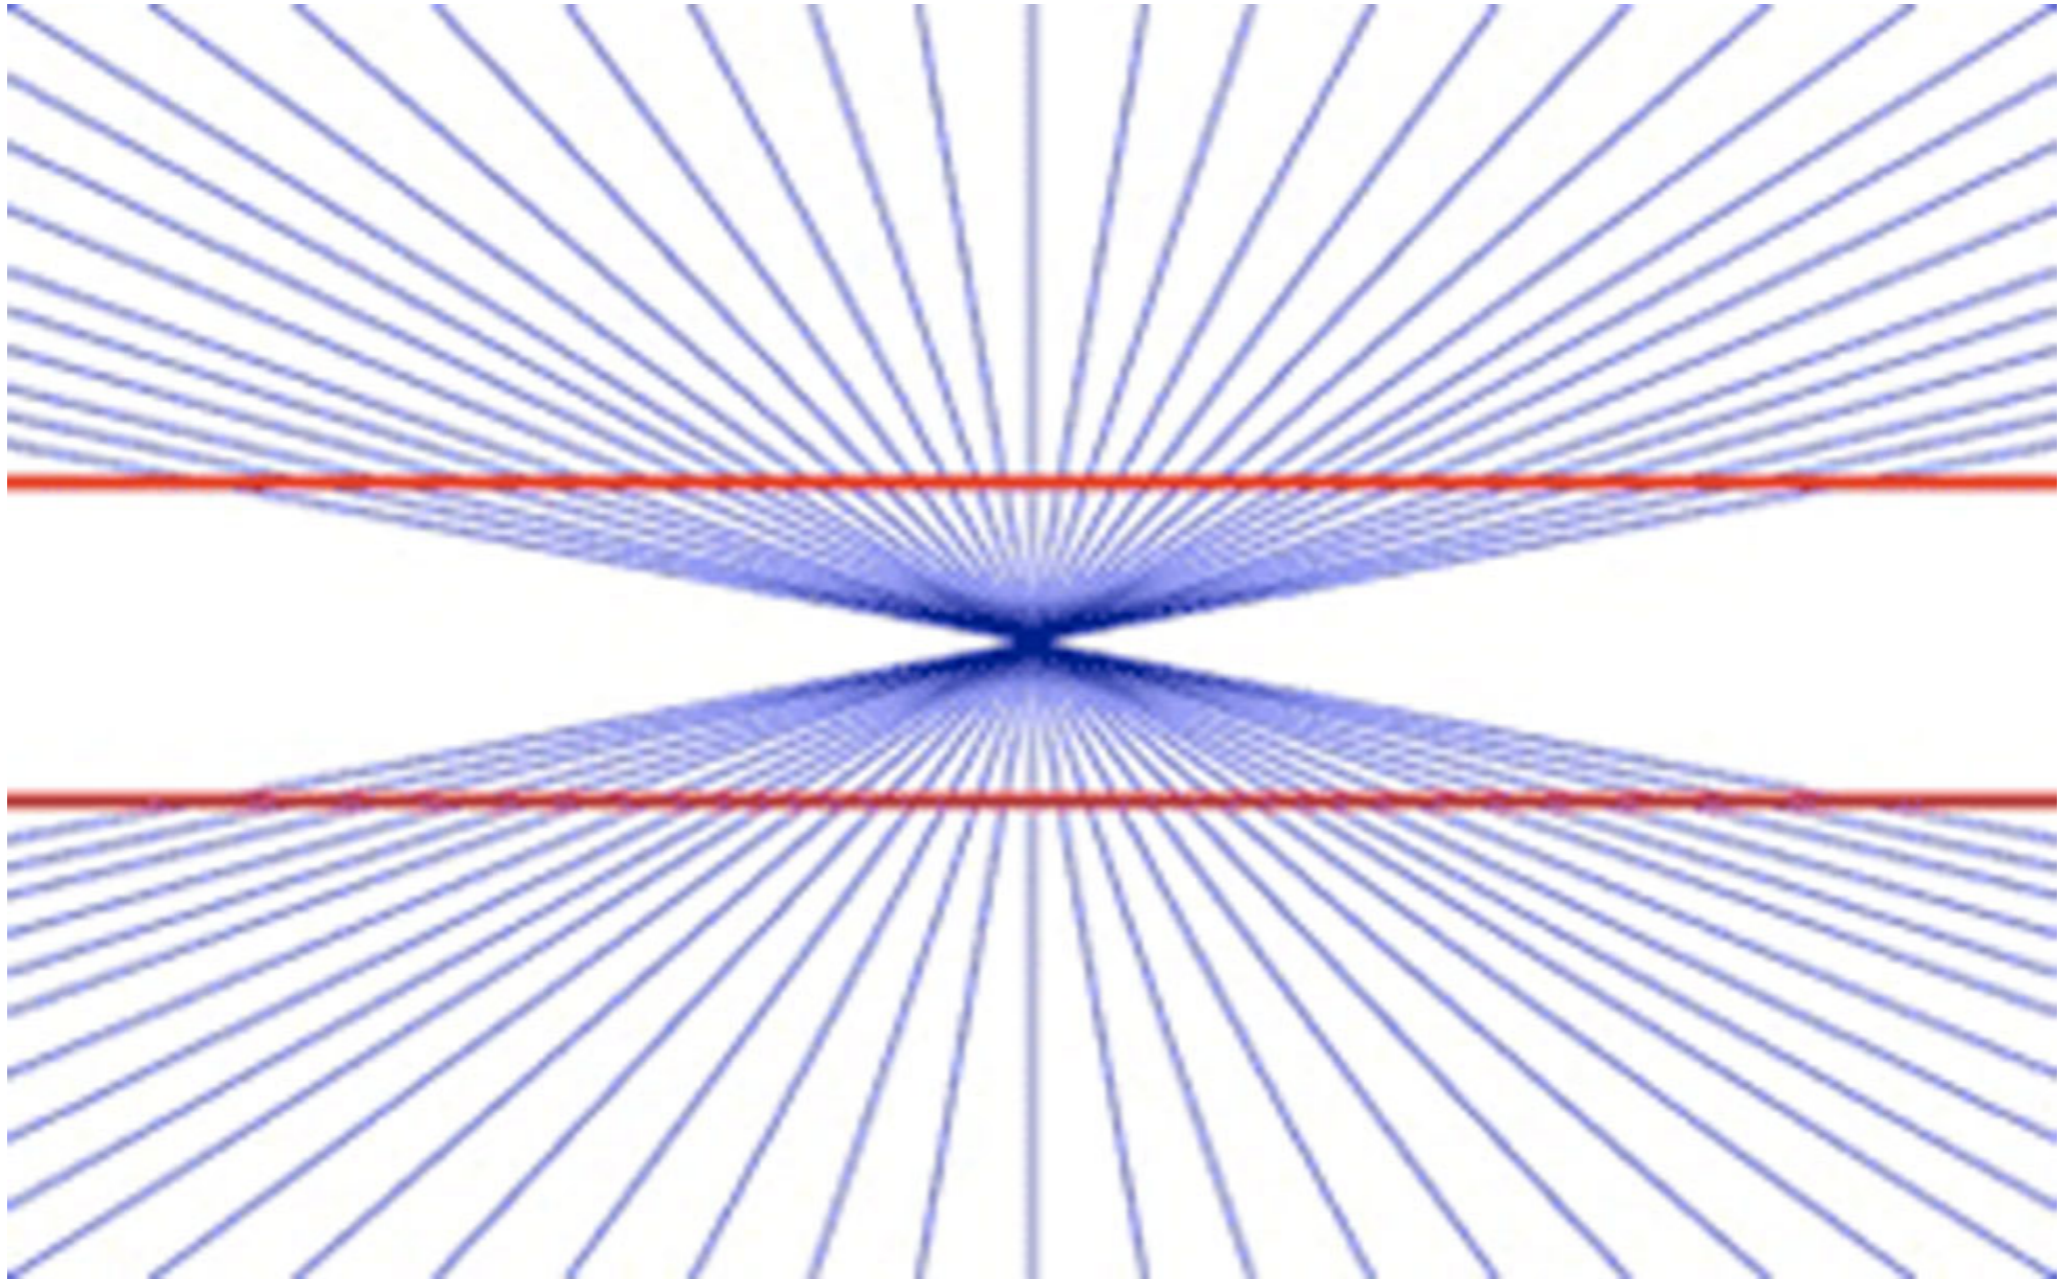

What is the the mistake?

1 2 3 4 5 6 7 8 9 10

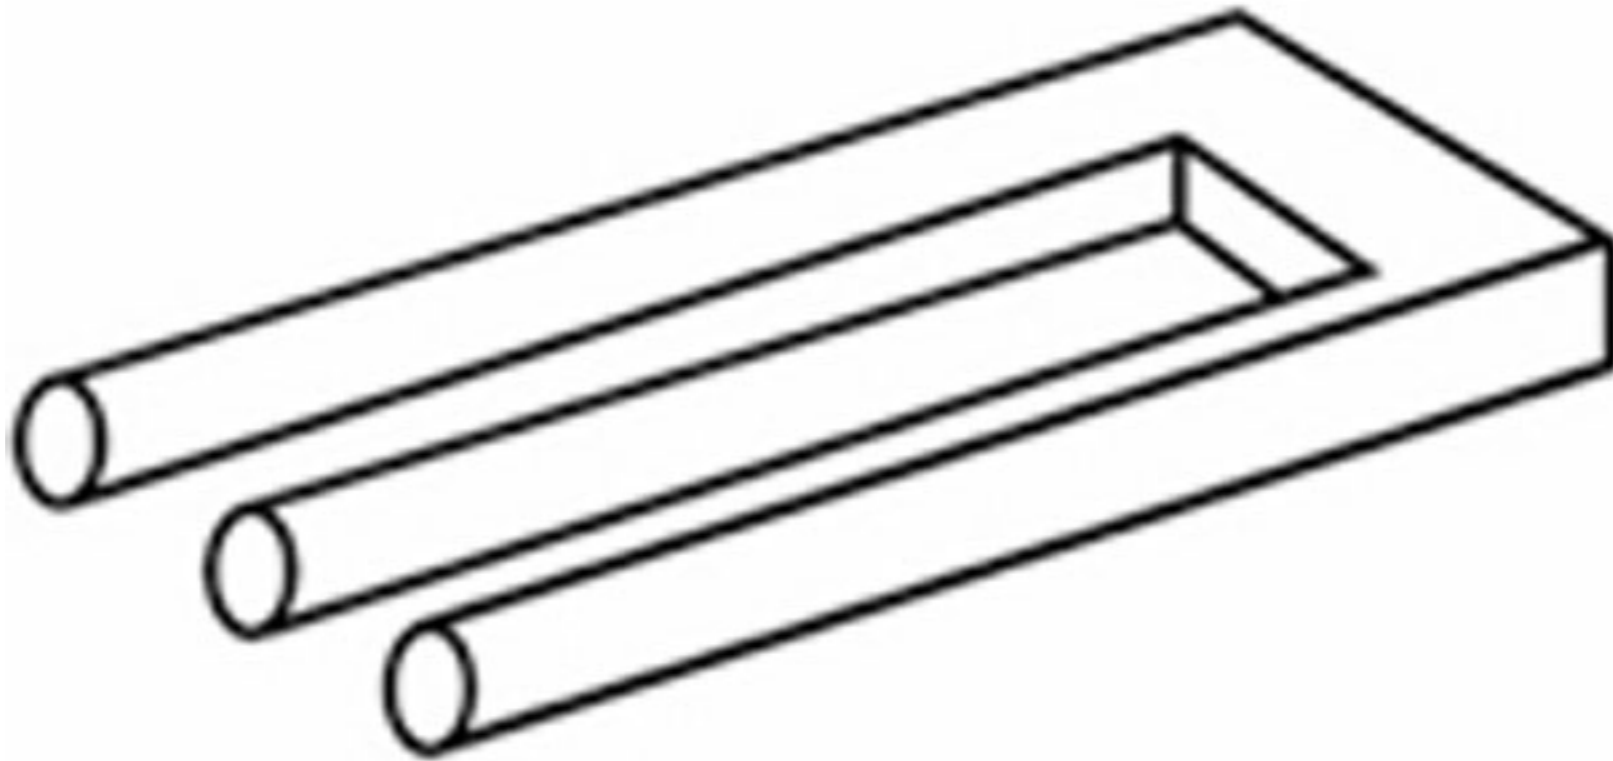

Are these moving?

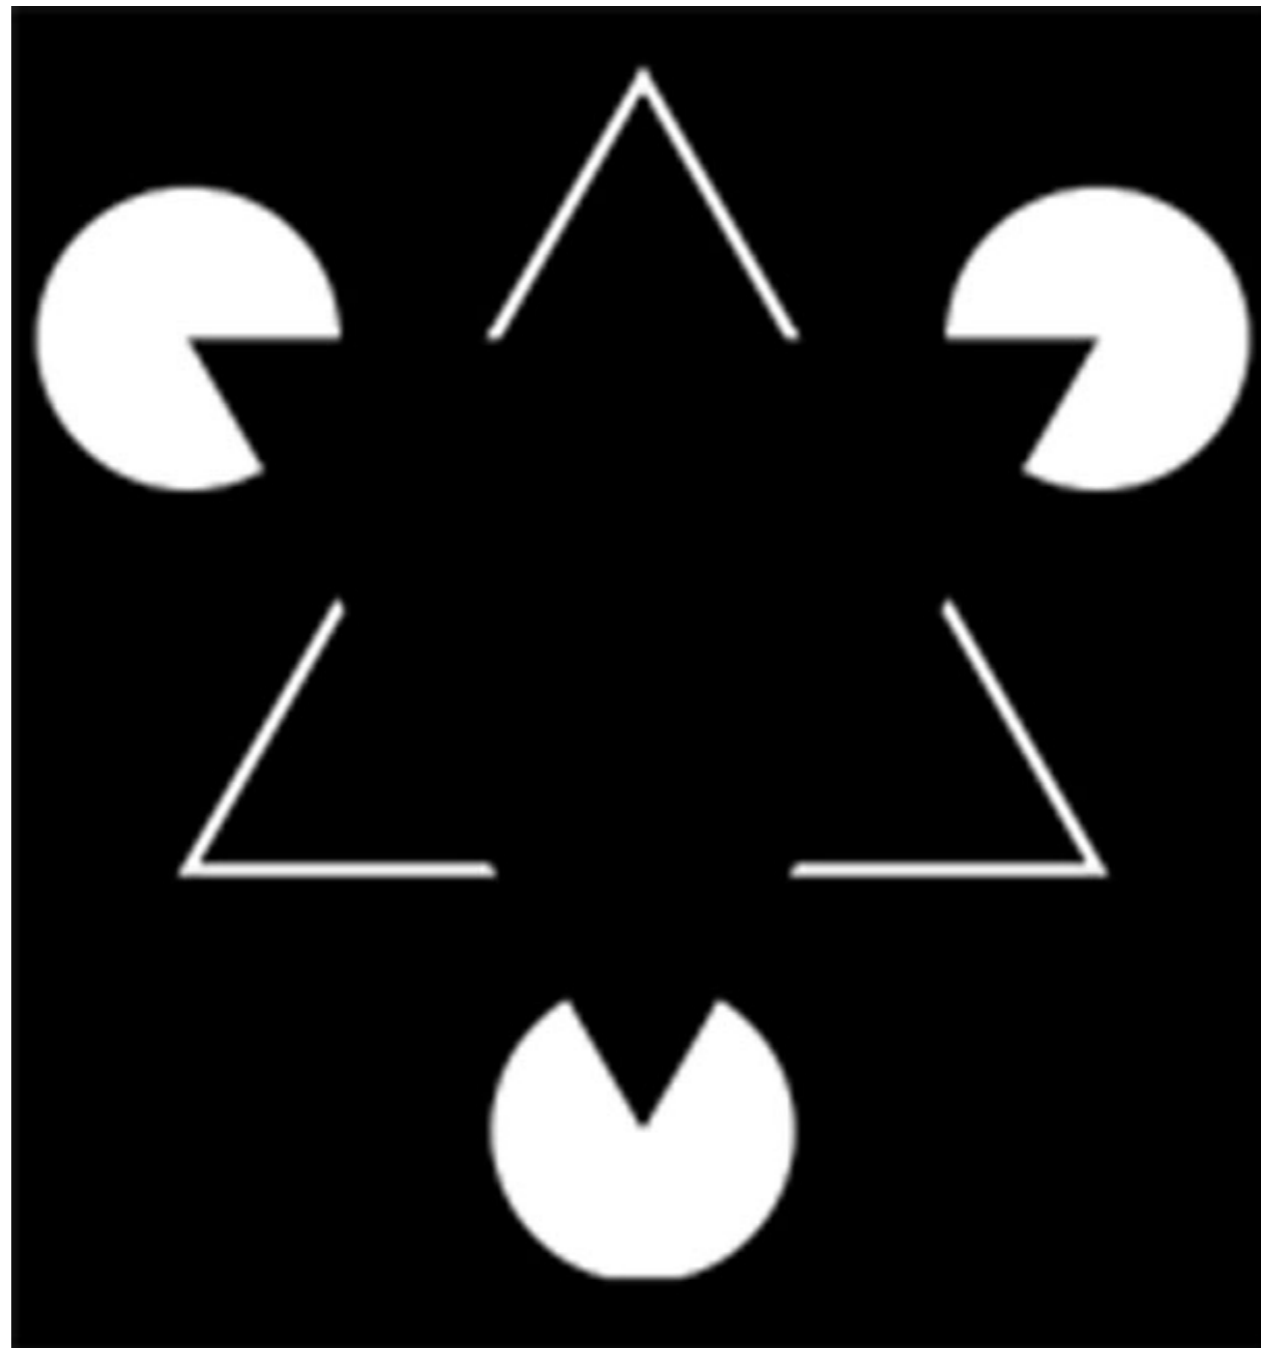

Are these lines straight or curved?

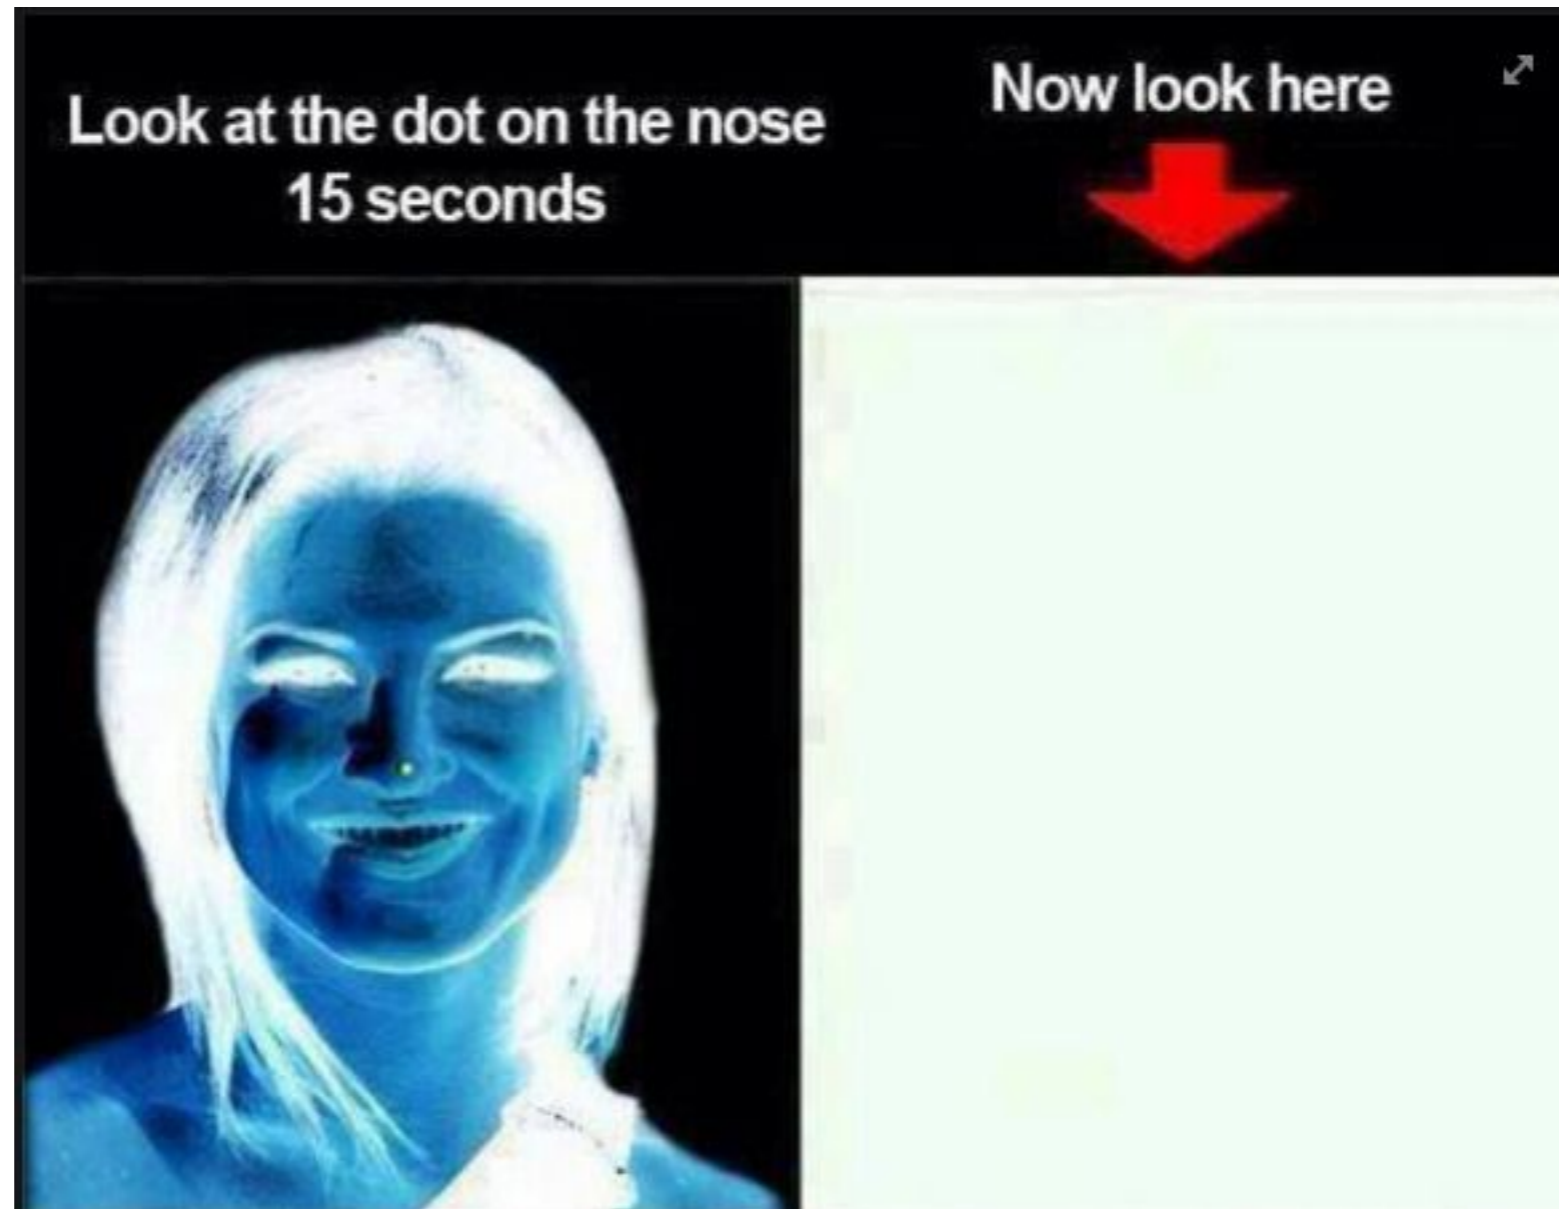

Is this weird?

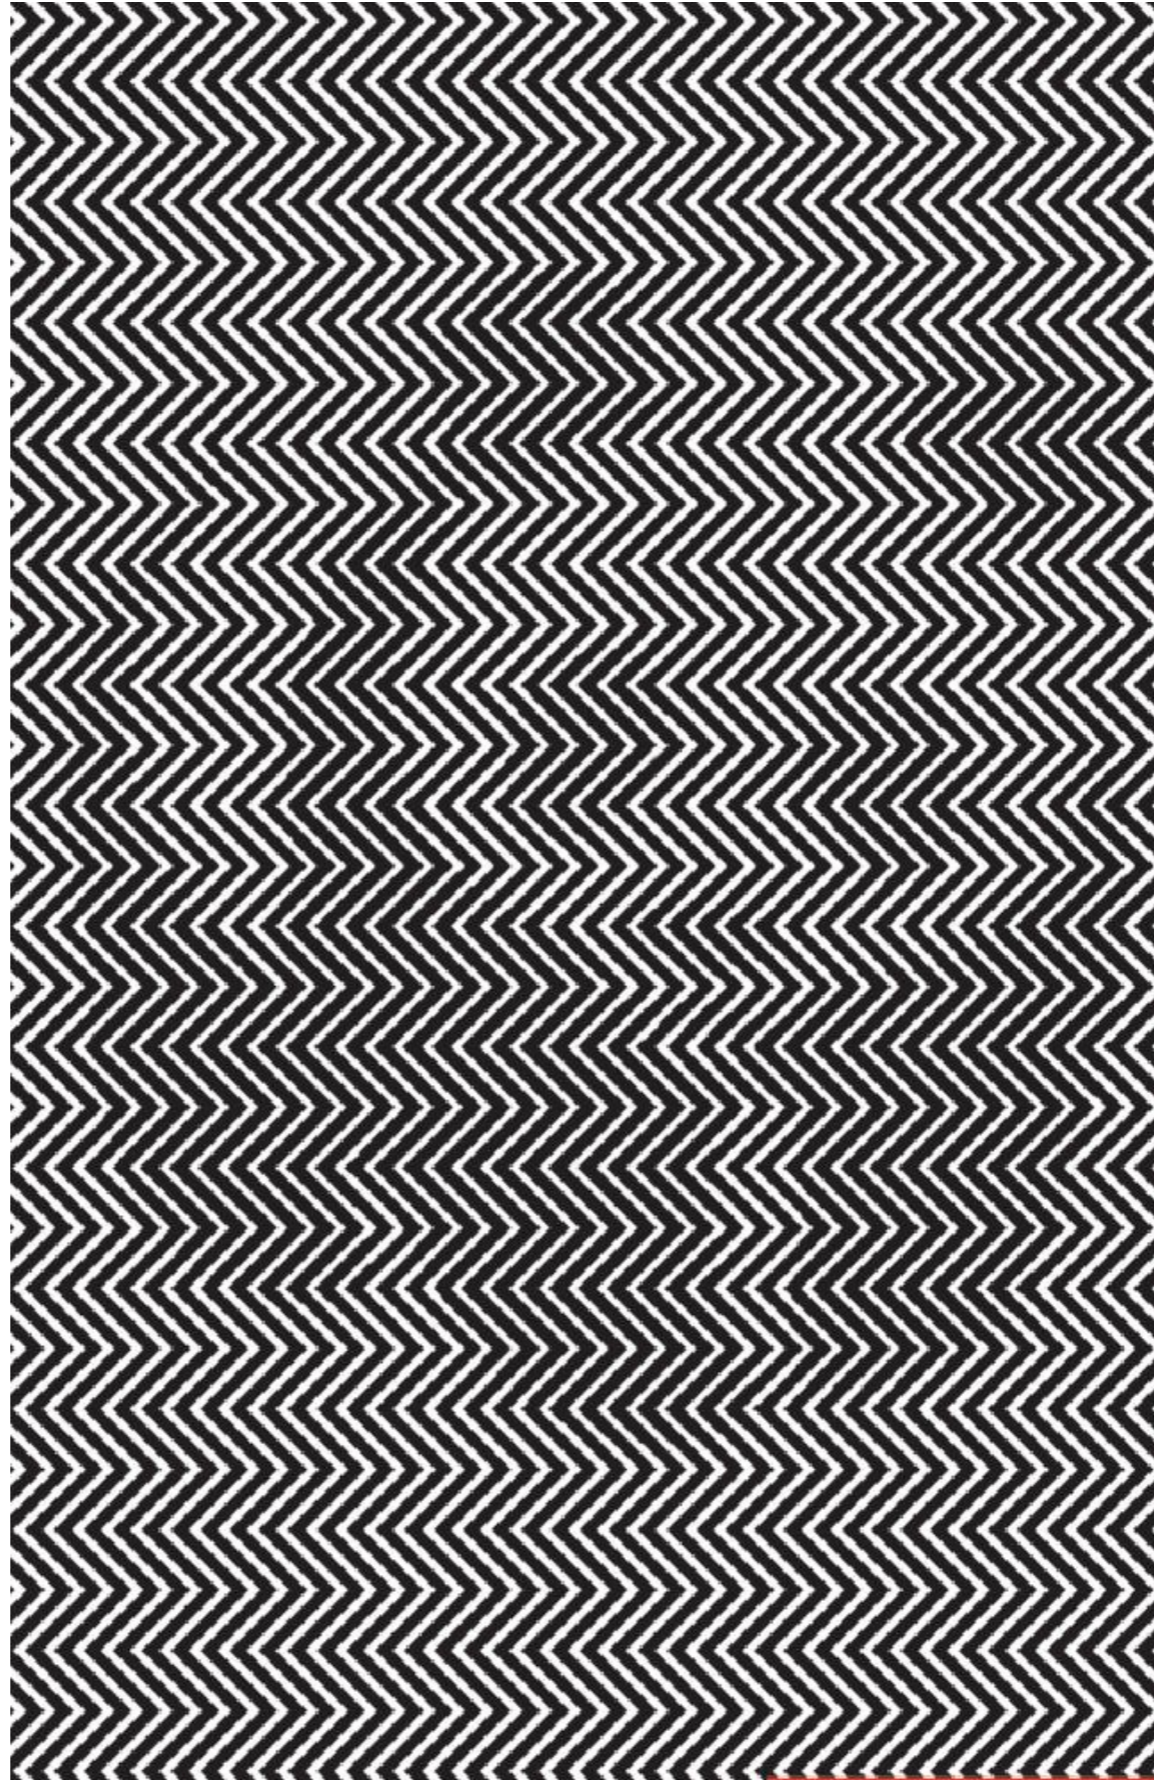

Do you see the black triangle?

Cool!

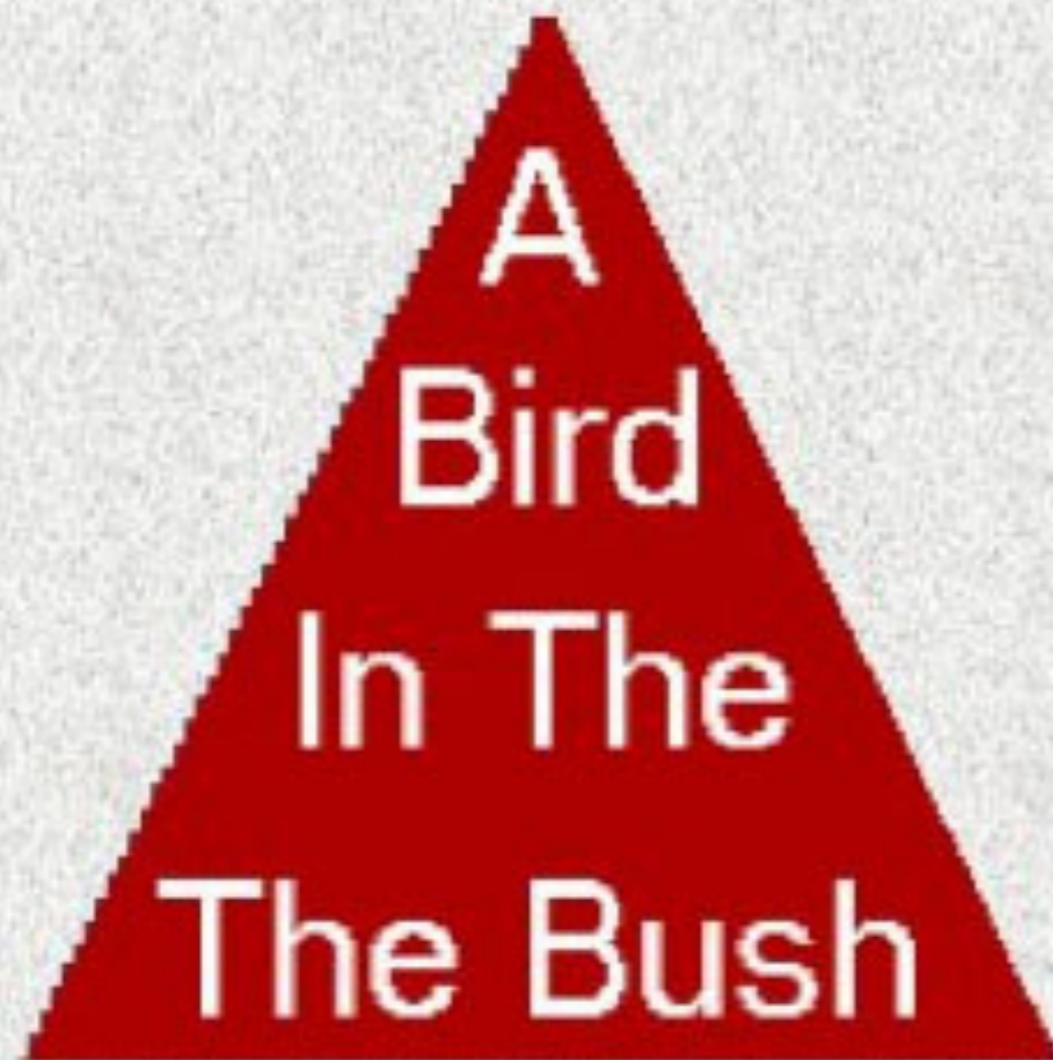

Do you see the panda?

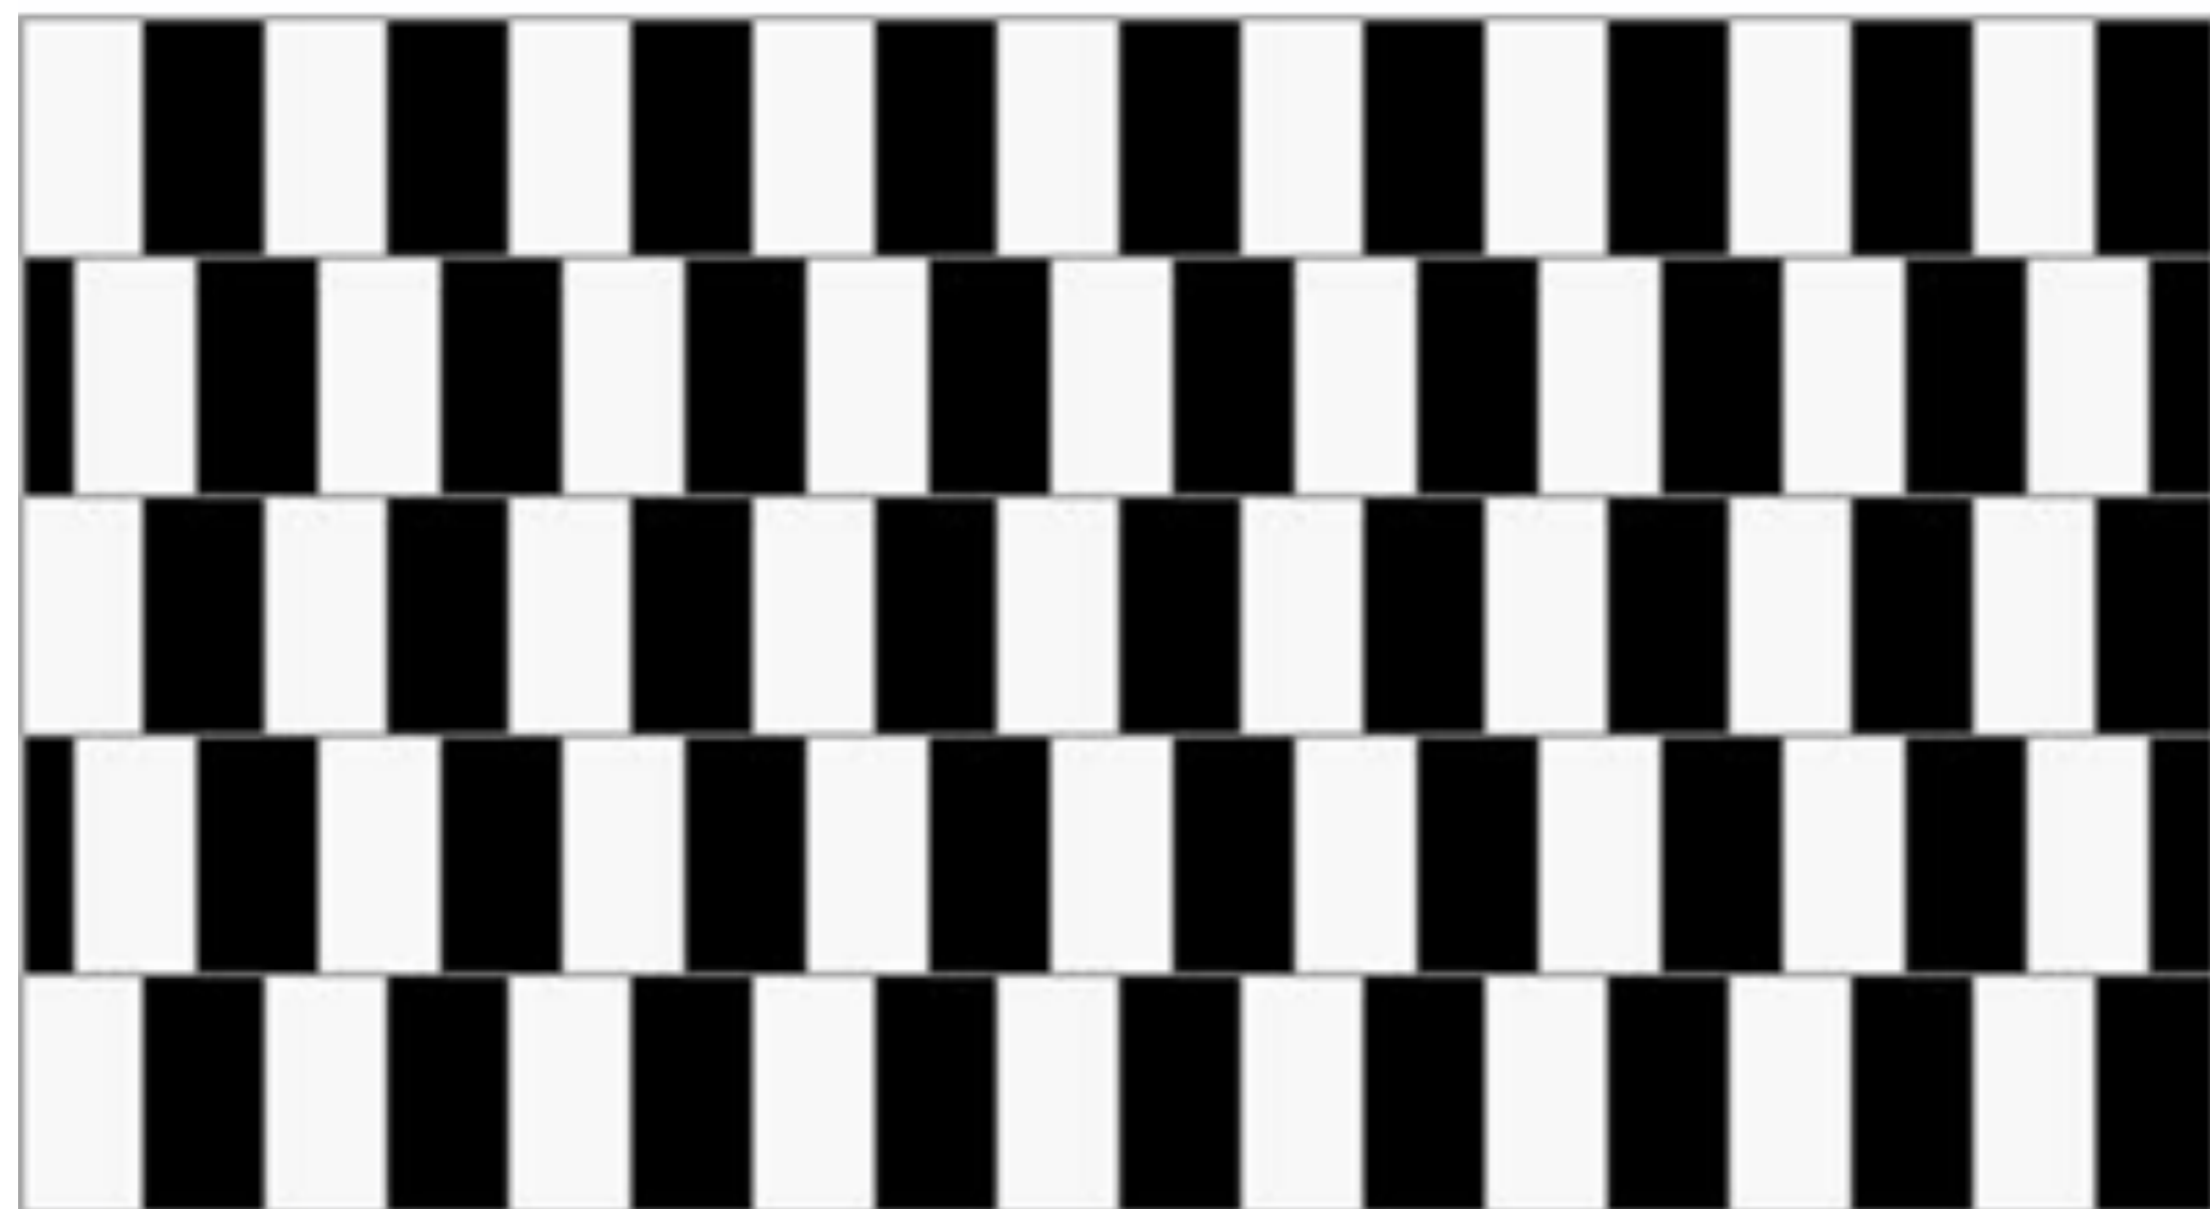

Do you see the vase or the two faces first?

- When you first read this, what does it say?
- **A Bird In The Bush?**
- If you read this more carefully you will find that it says **A Bird In The The Bush!!!**

Are the horizontal lines sloping or straight?

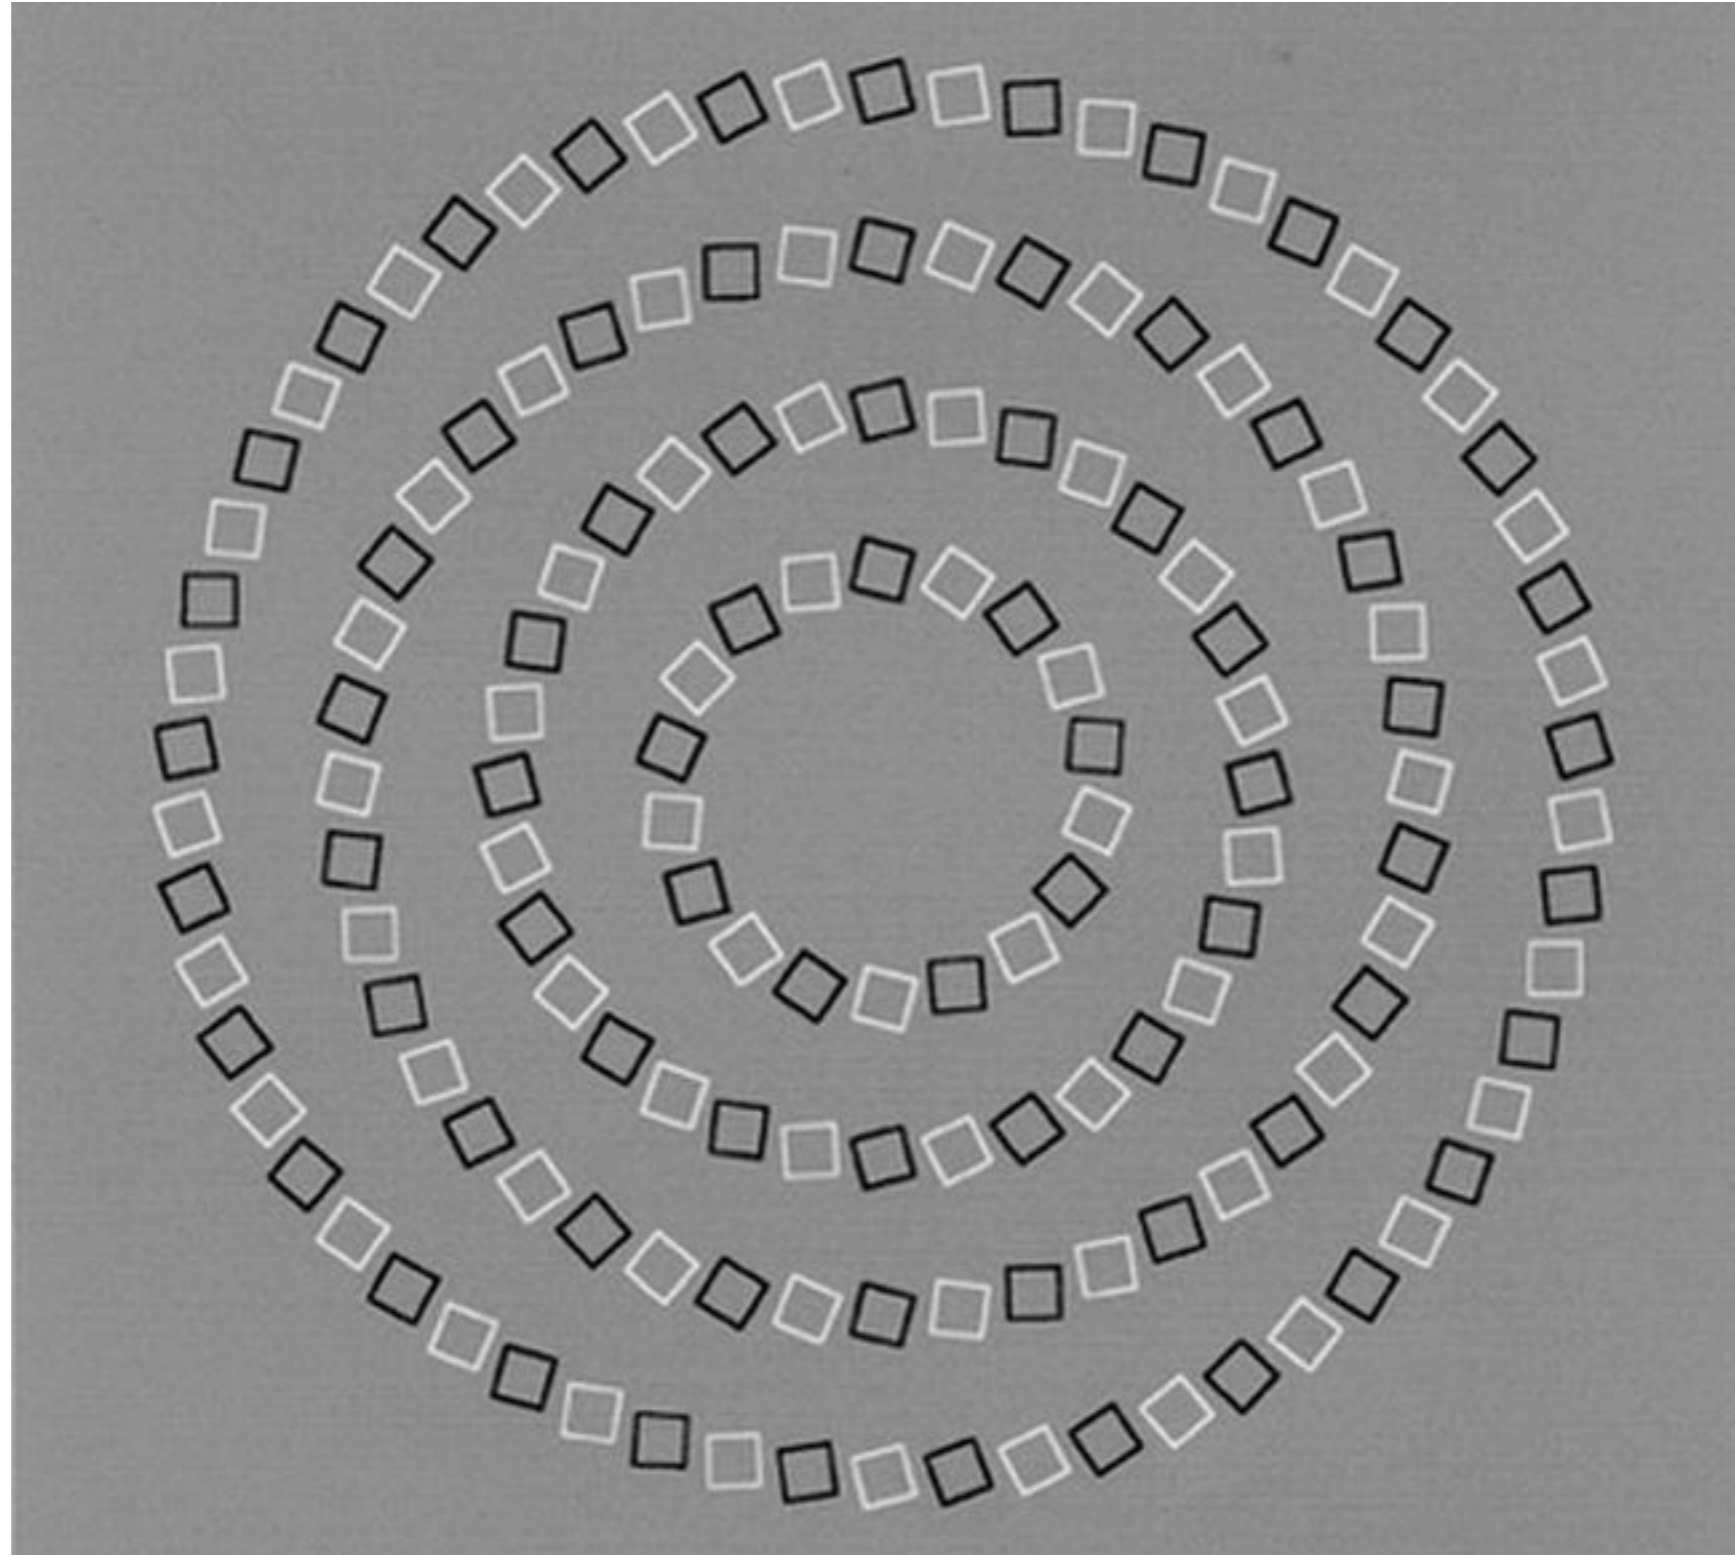

**Answer: All of the lines are straight.
The black and white blocks are not aligned and thus
fool your brain into thinking that the lines are
sloping.**

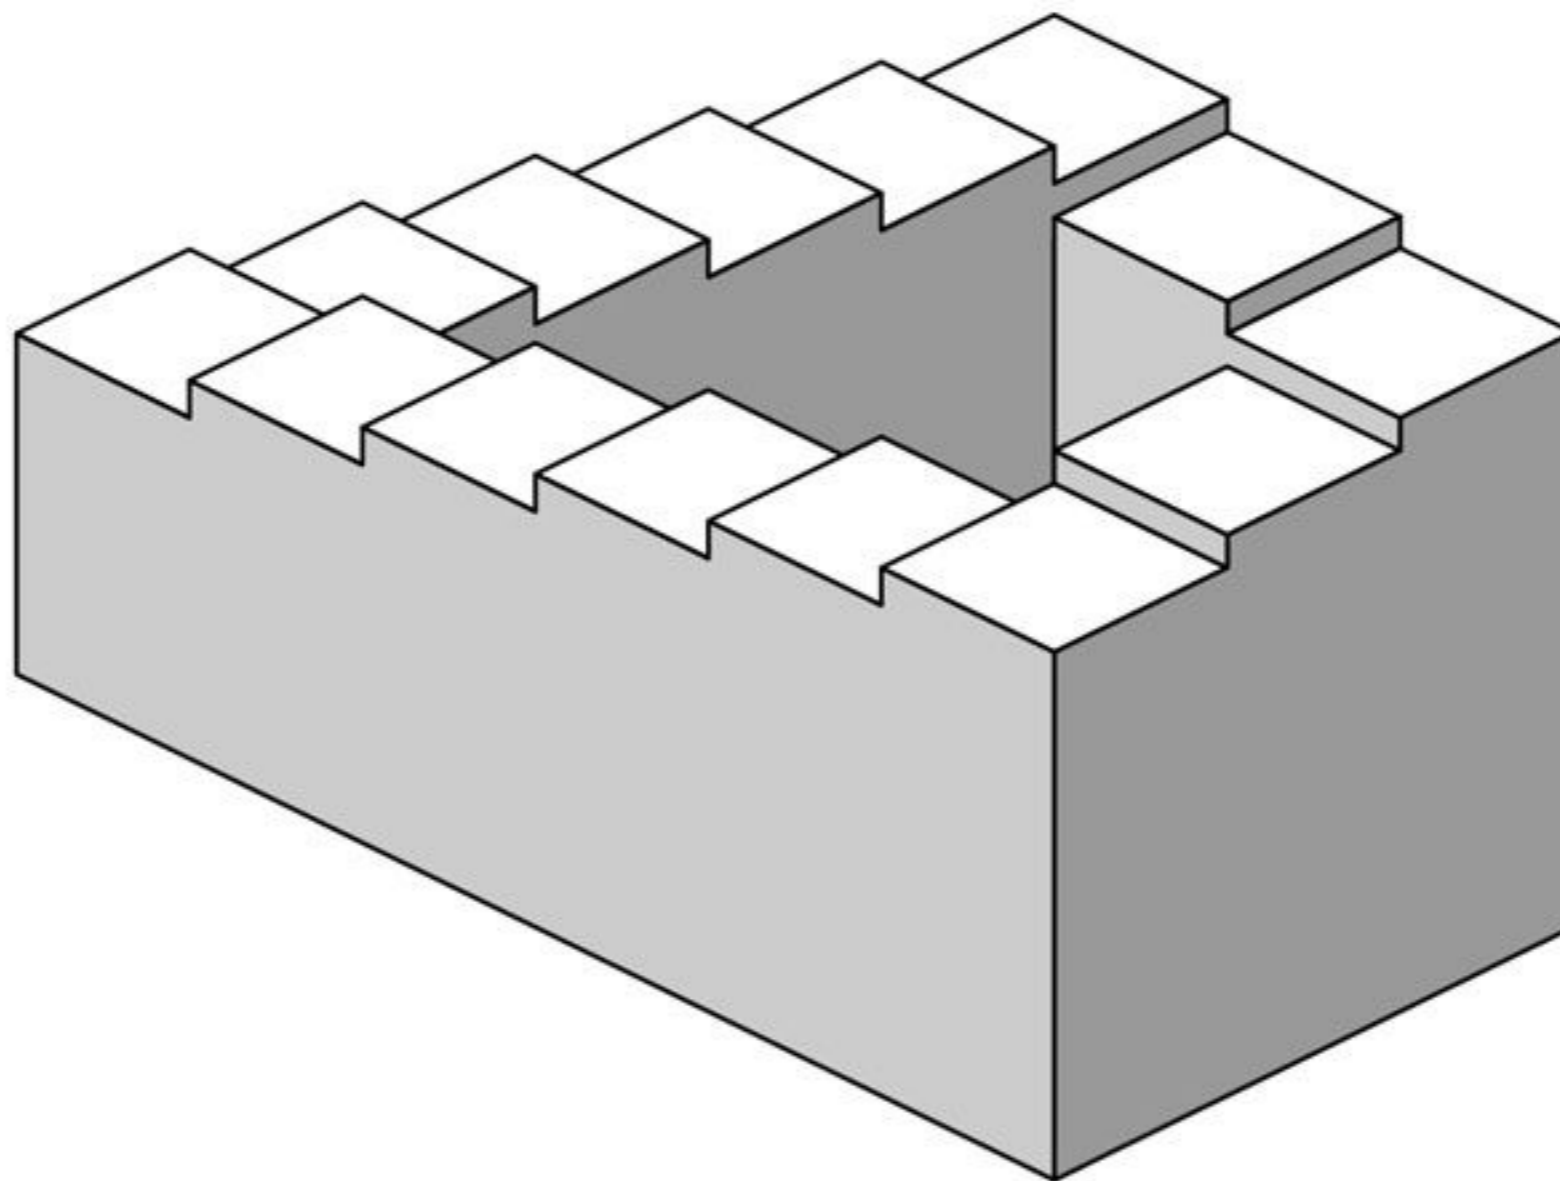

Witch line is longer?

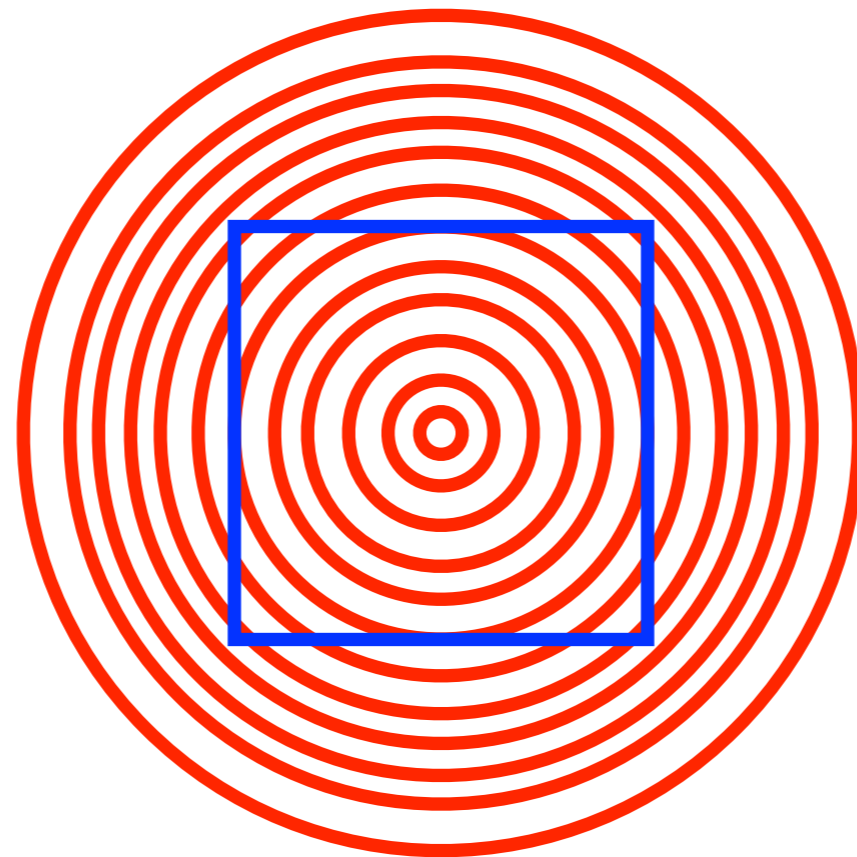

Is this a spiral?

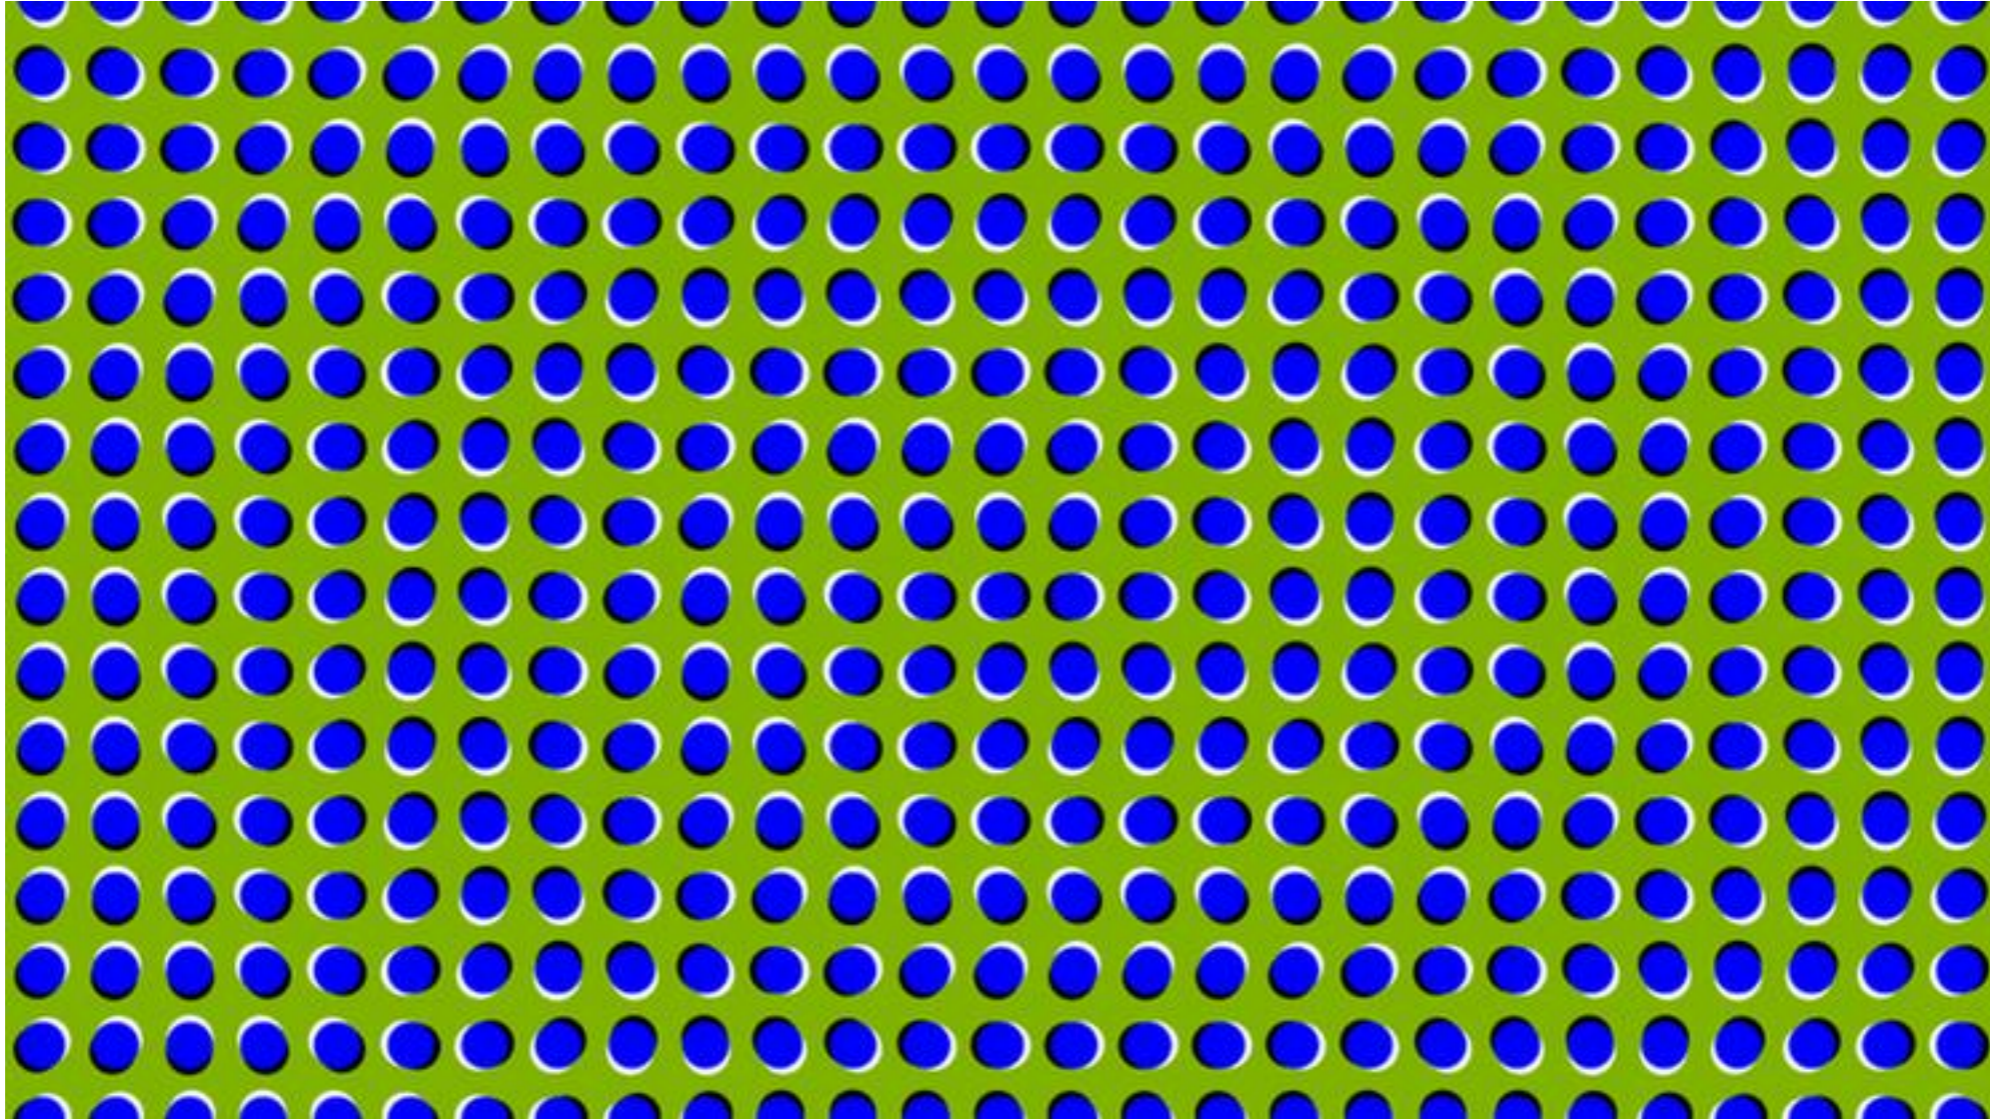

Seems like you are always going down!

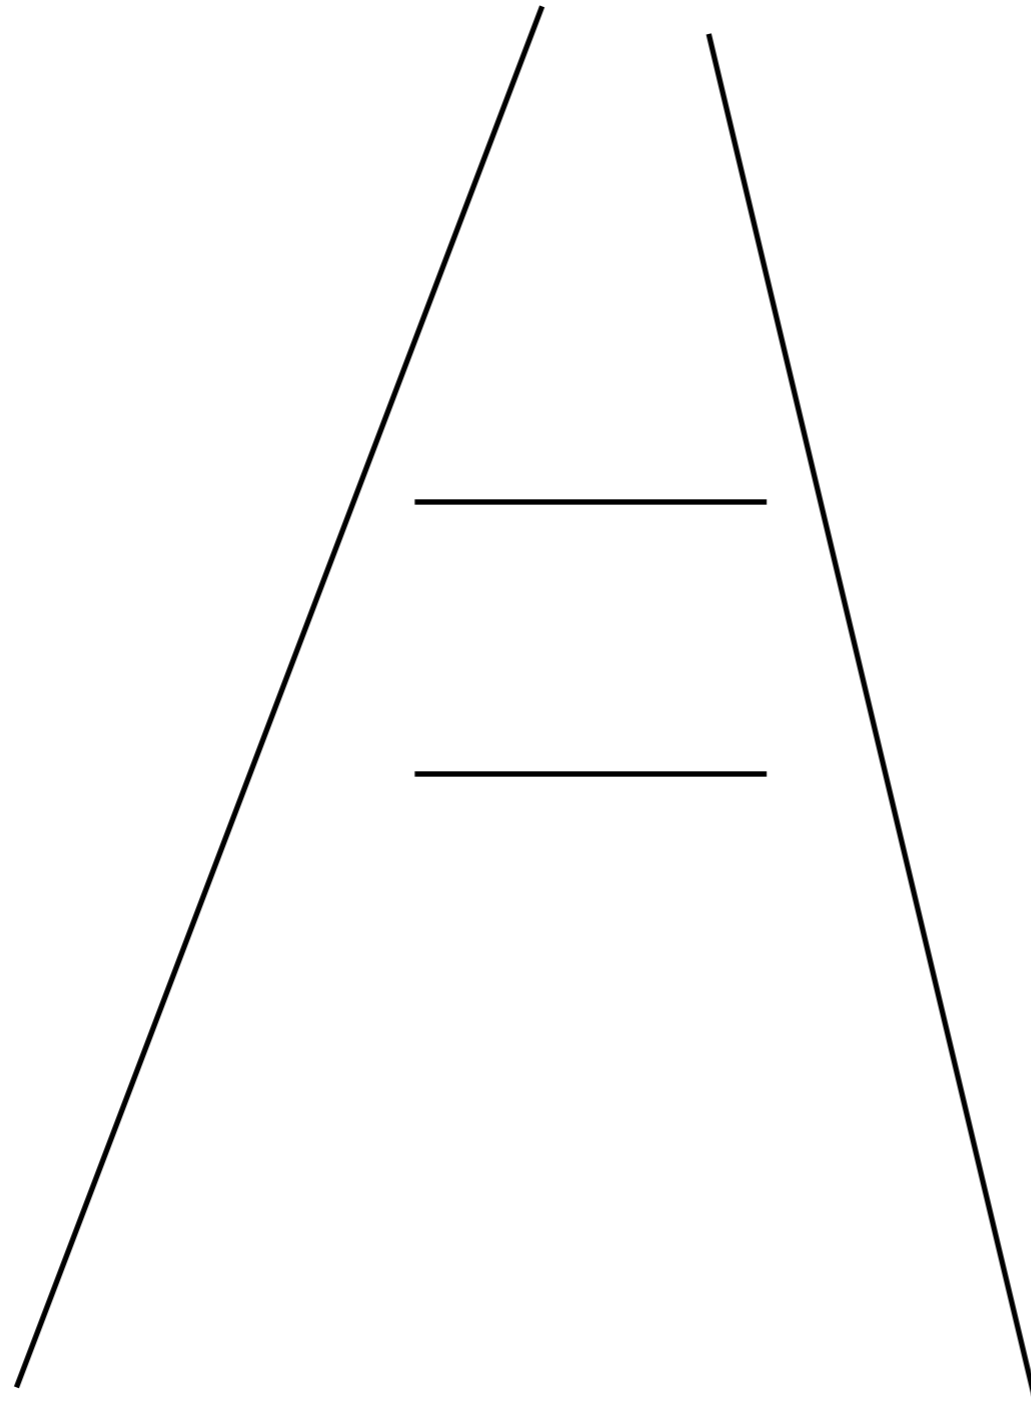

Who bent the square?

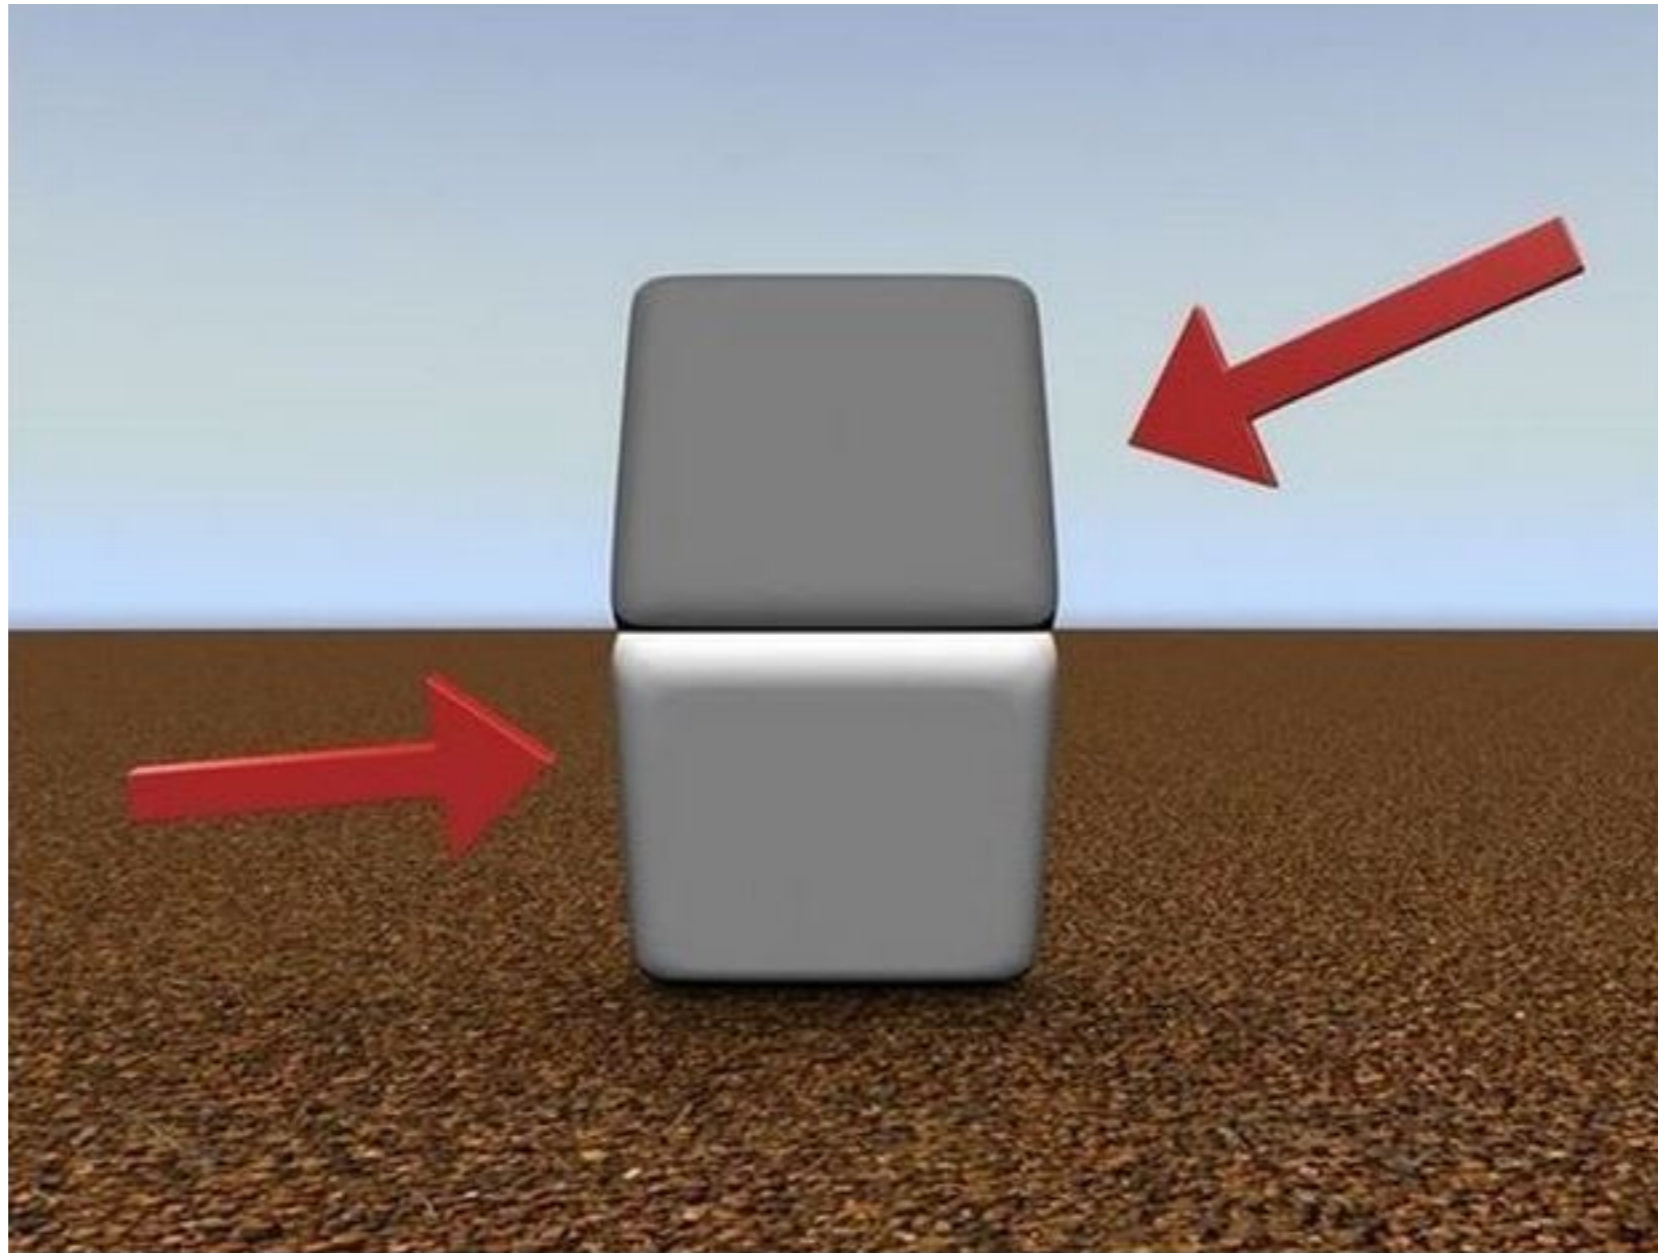

Are the dots moving?

Witch line is longer?

Same colors?

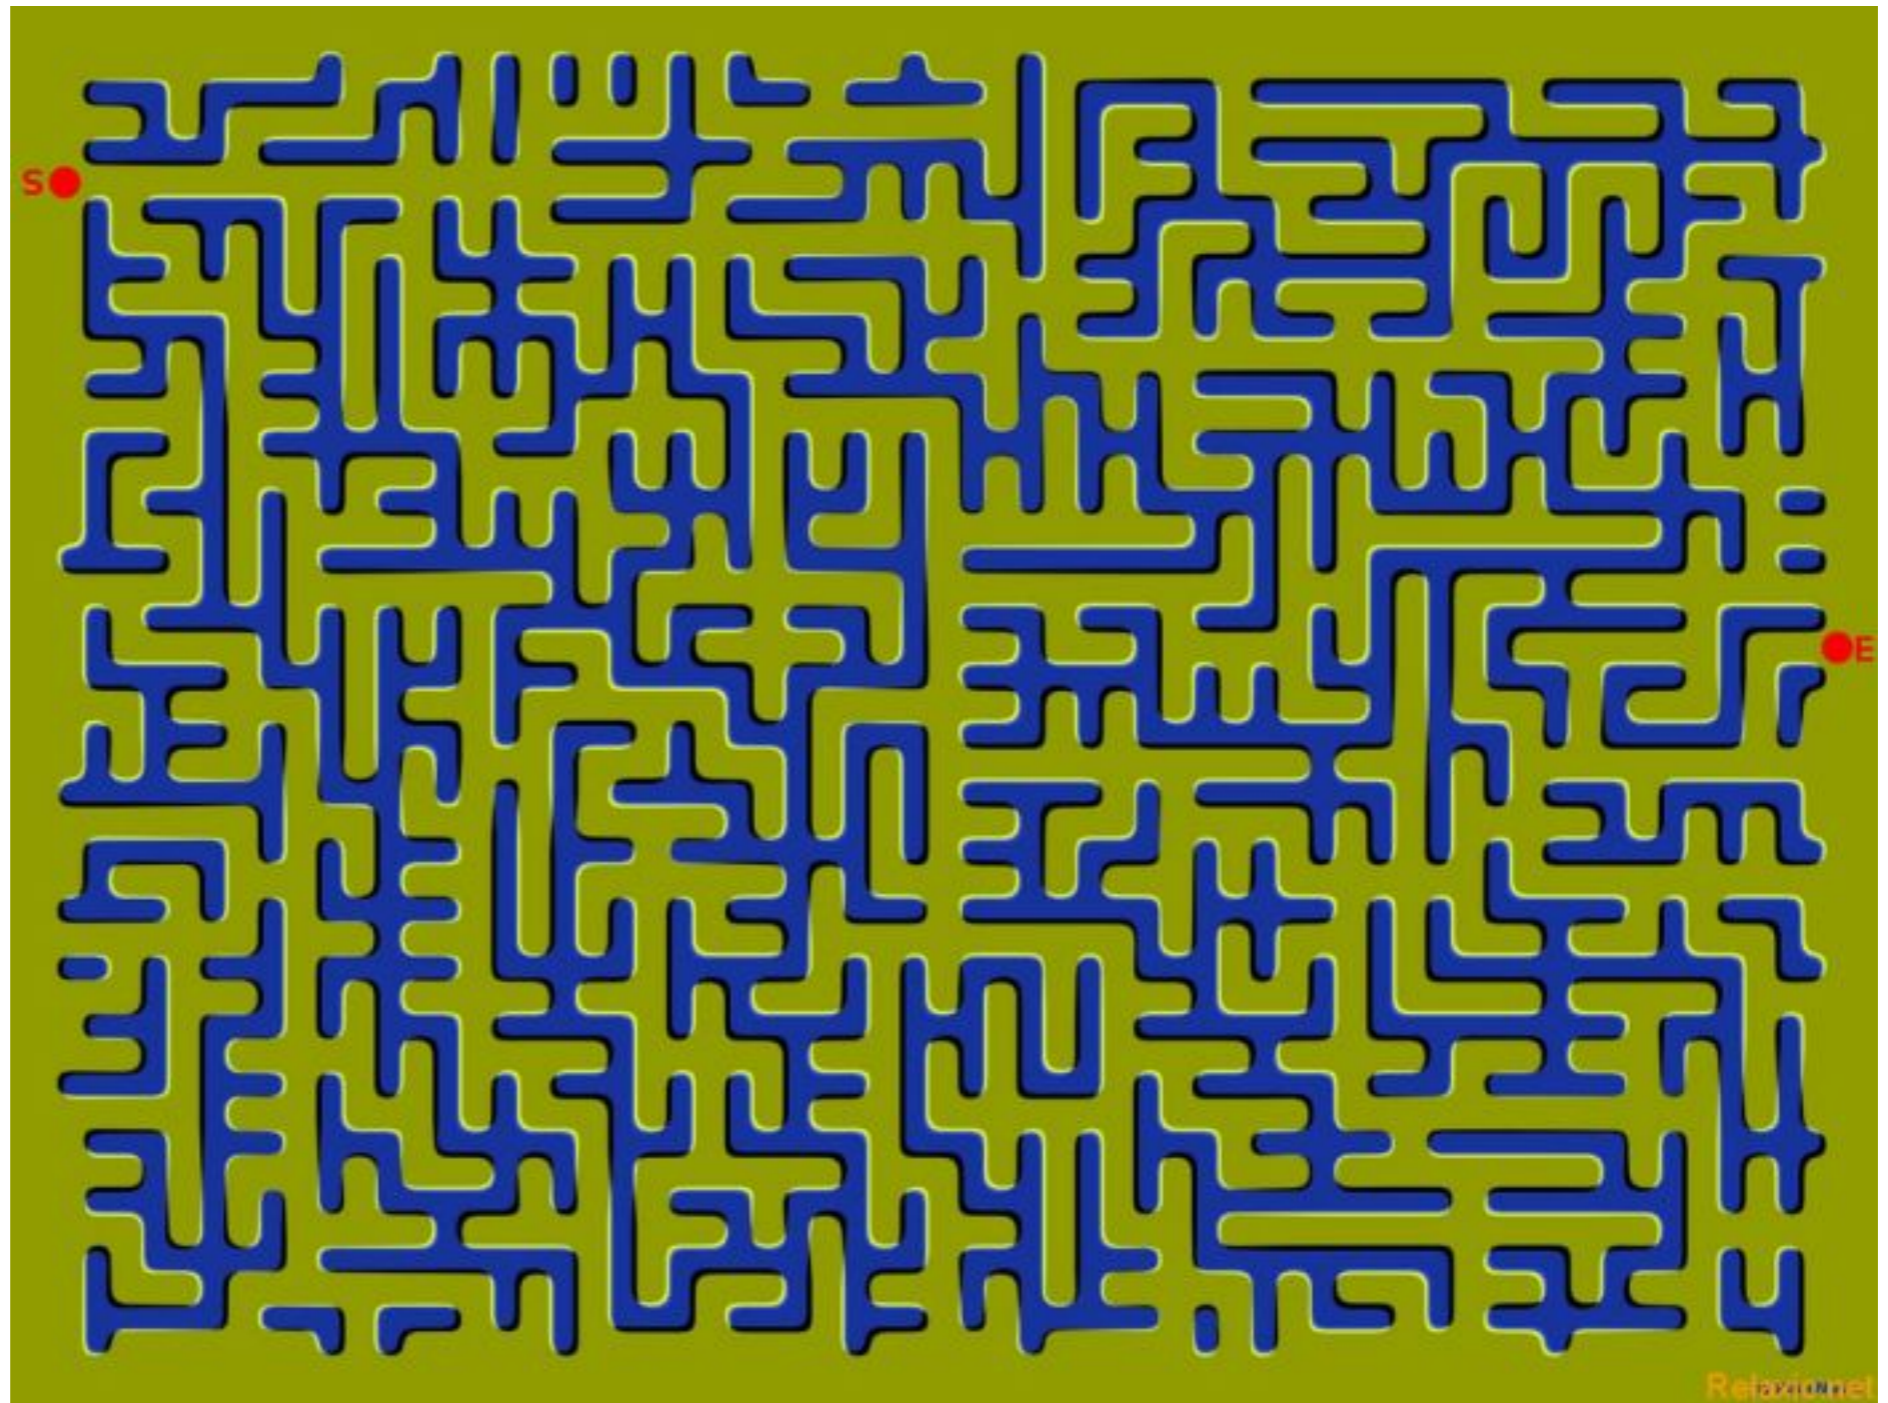

Yes

Cover the middle

Are these beans moving?

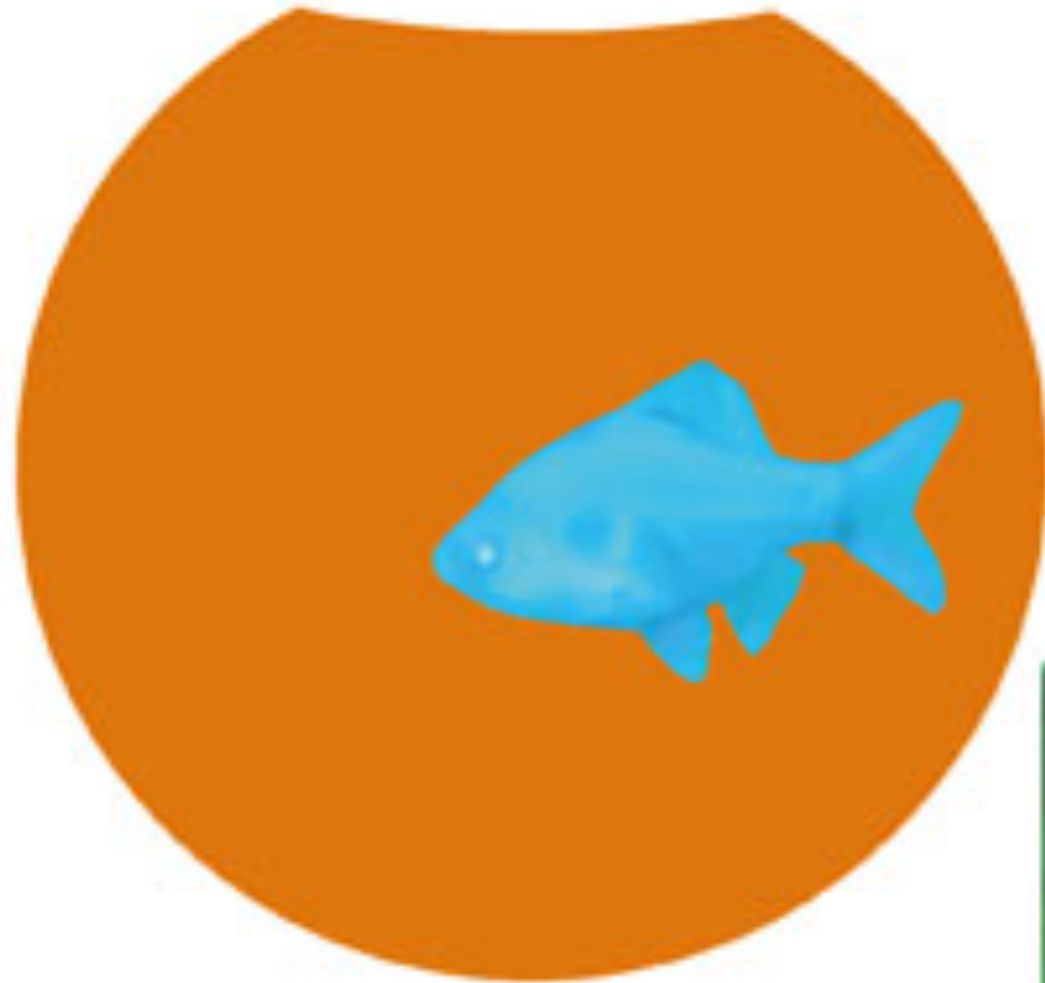

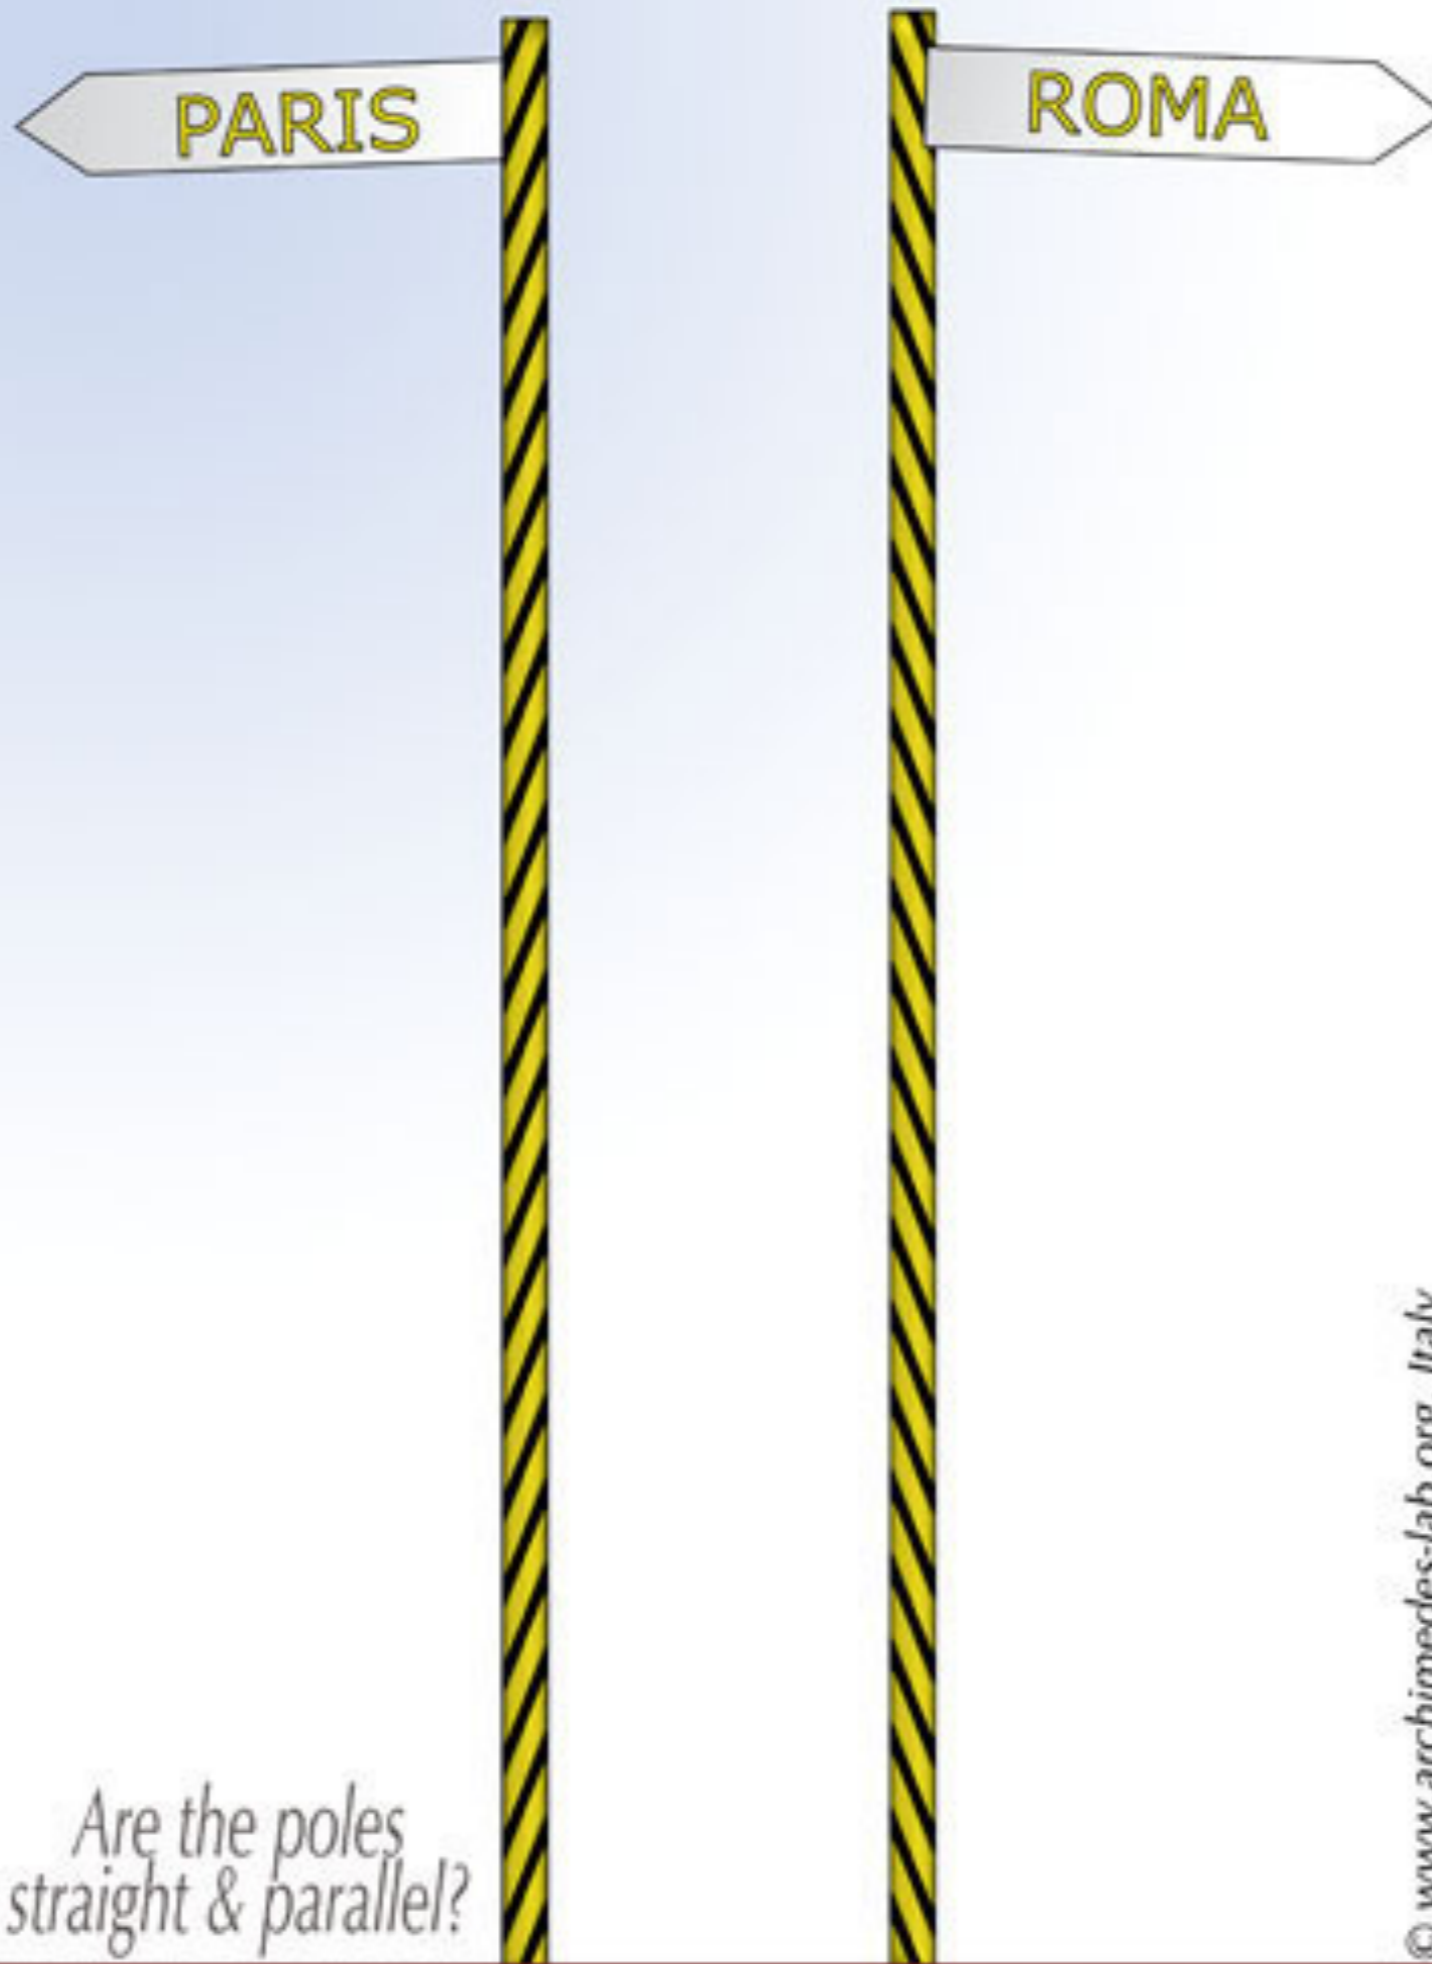

Is the Maze moving?

Aquarium After-image Effect

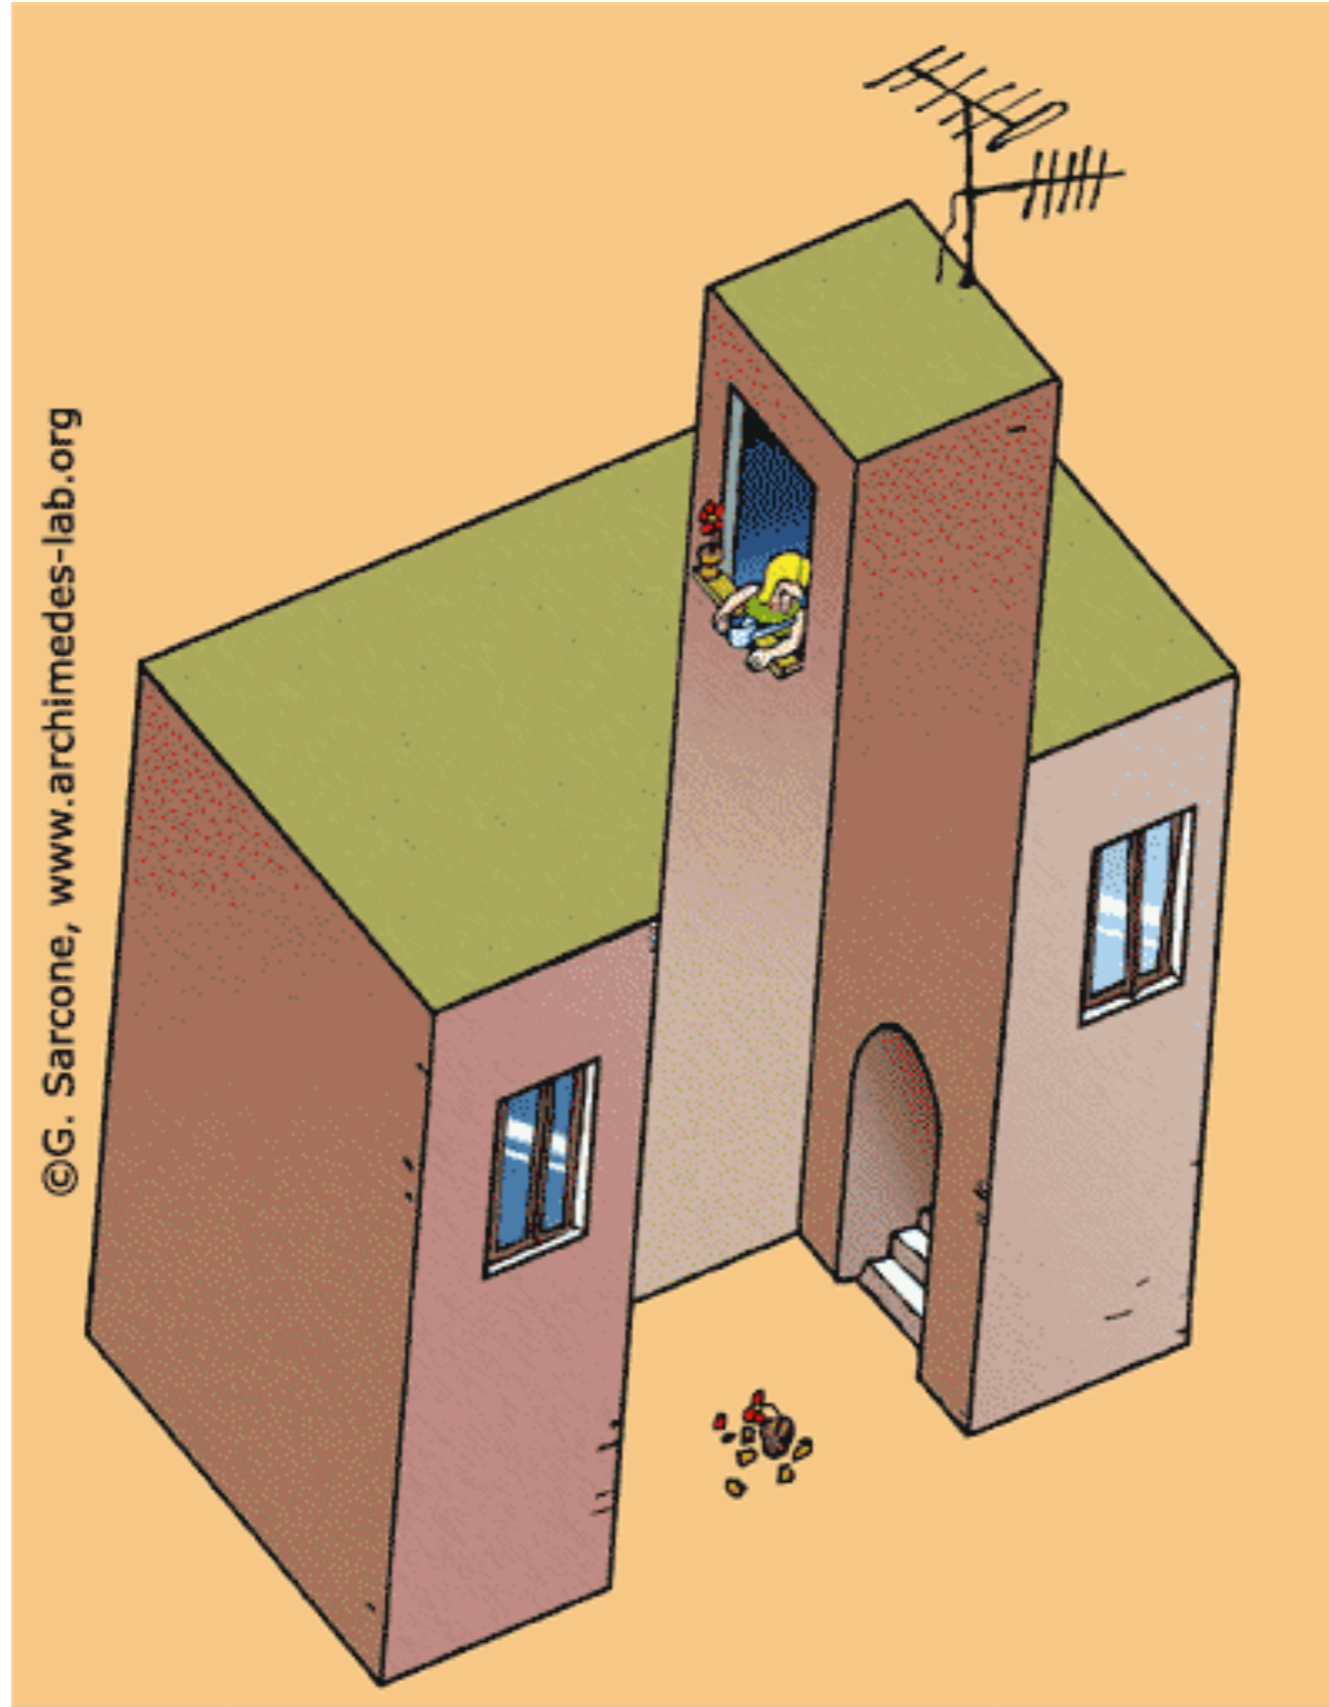

Stare at the orange disc for about 30 seconds,
then shift your gaze on the bowl aquarium...

Are the poles
straight & parallel?

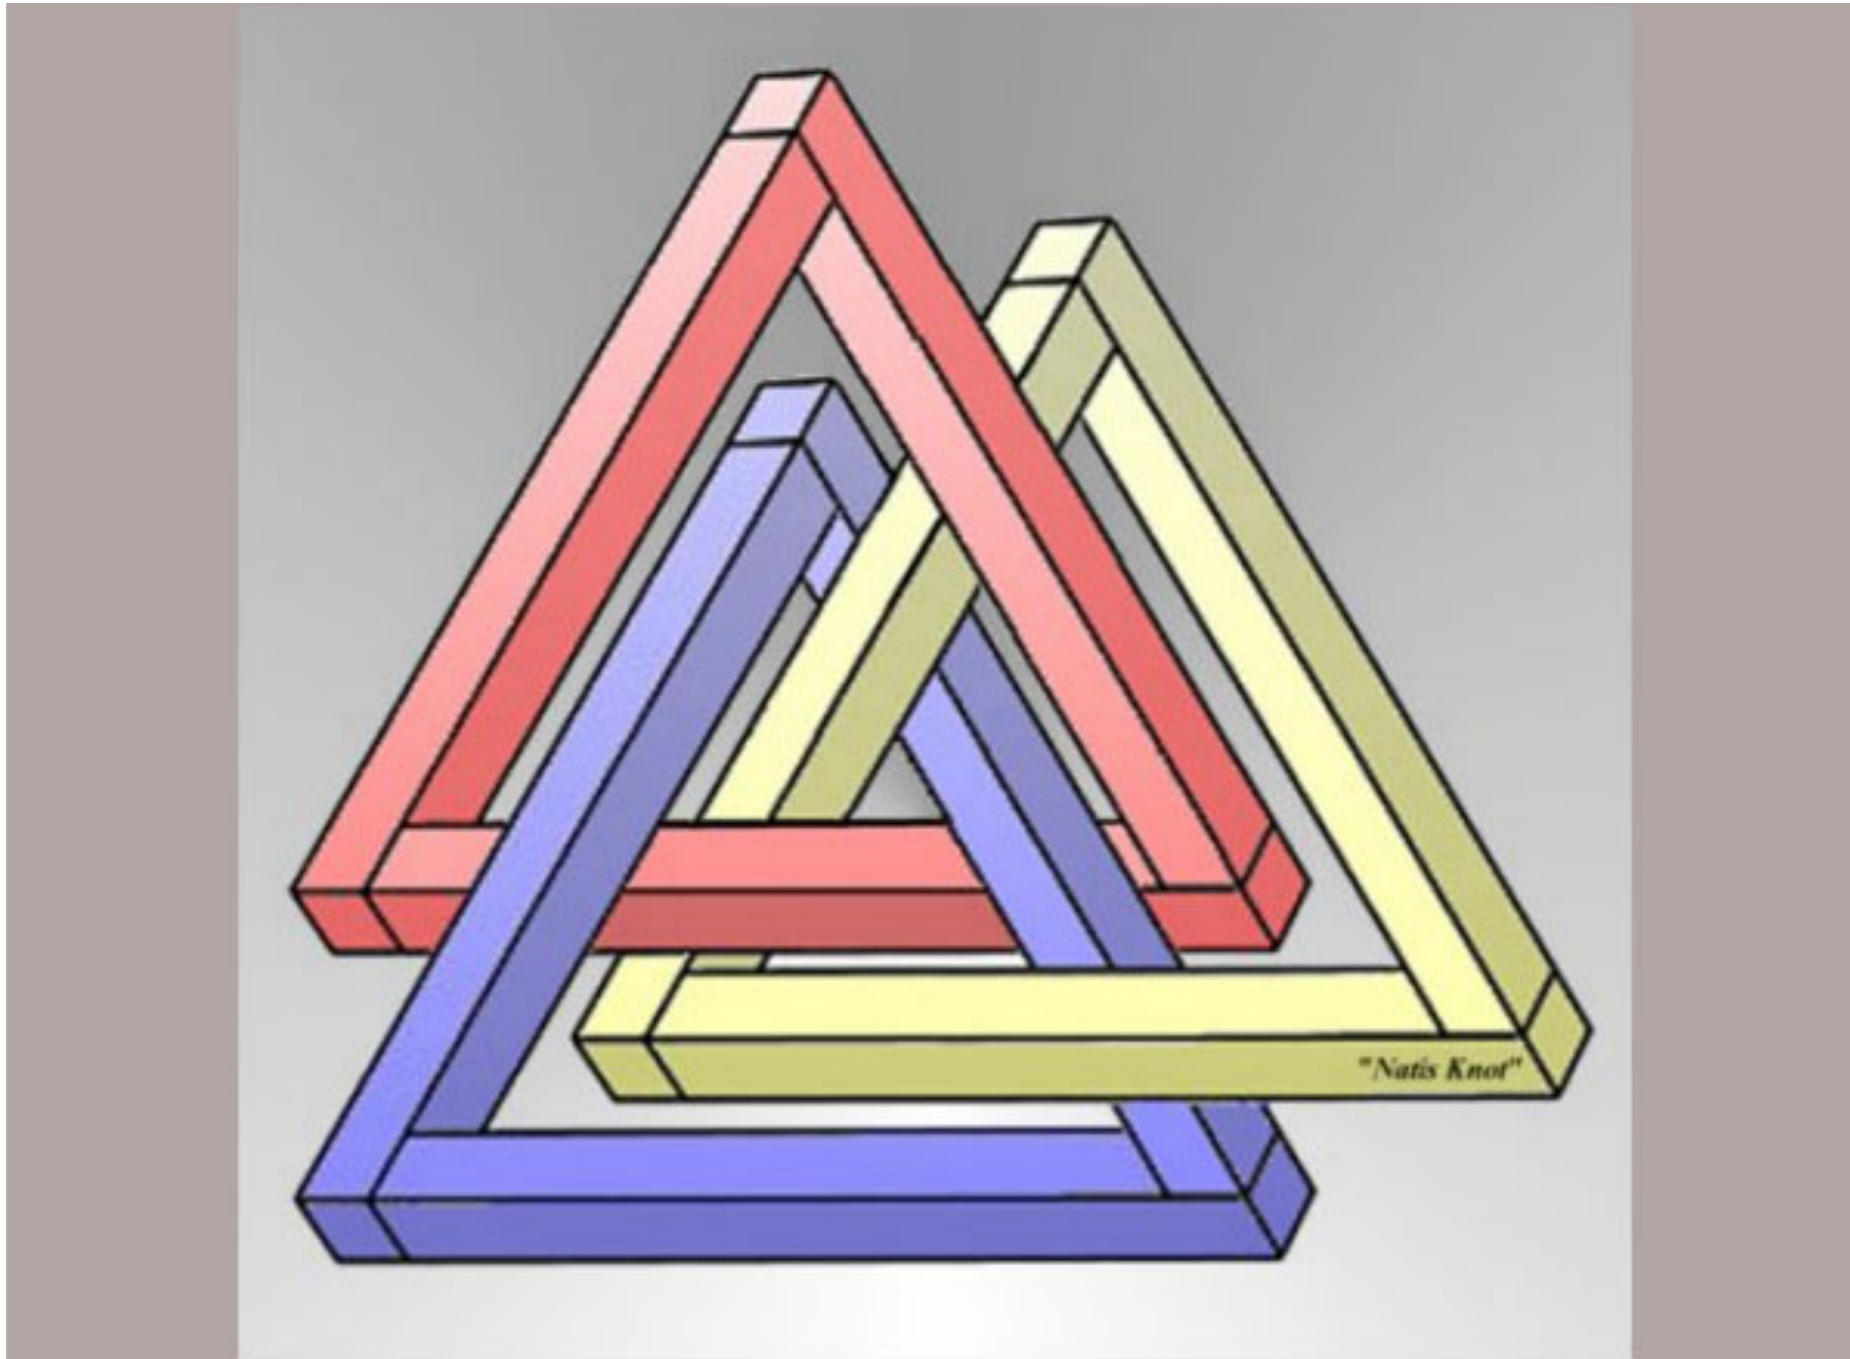

Oops!

Wait, what?

Weird.

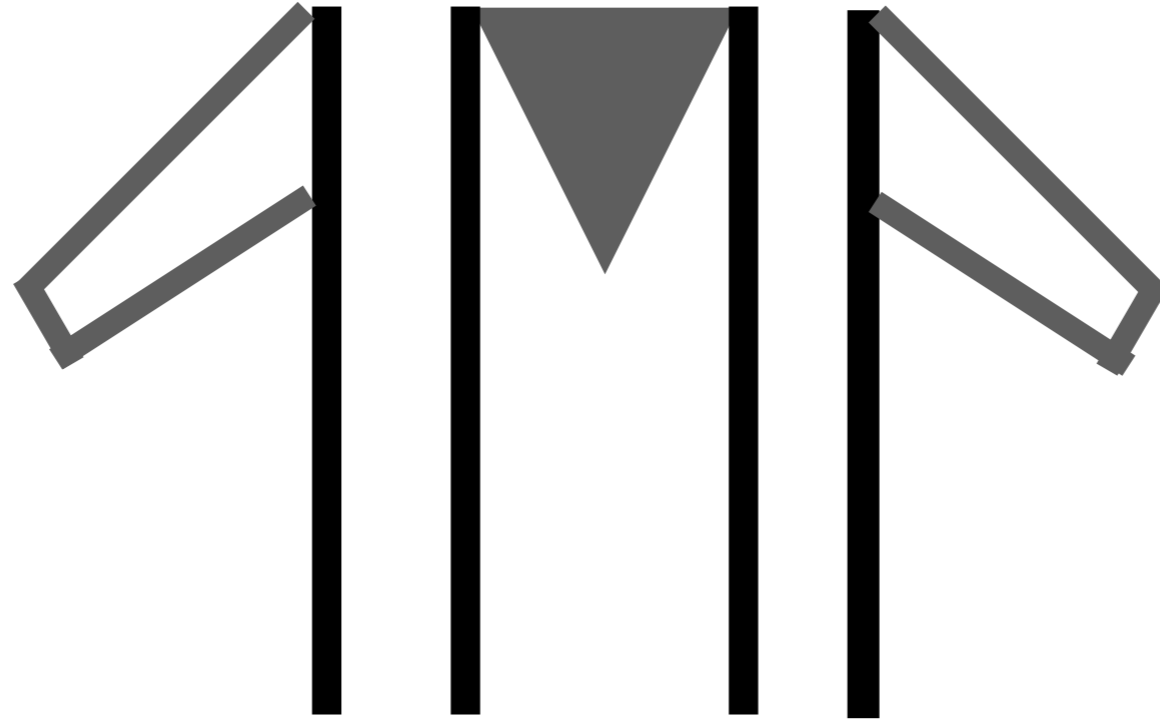

Good or evil?

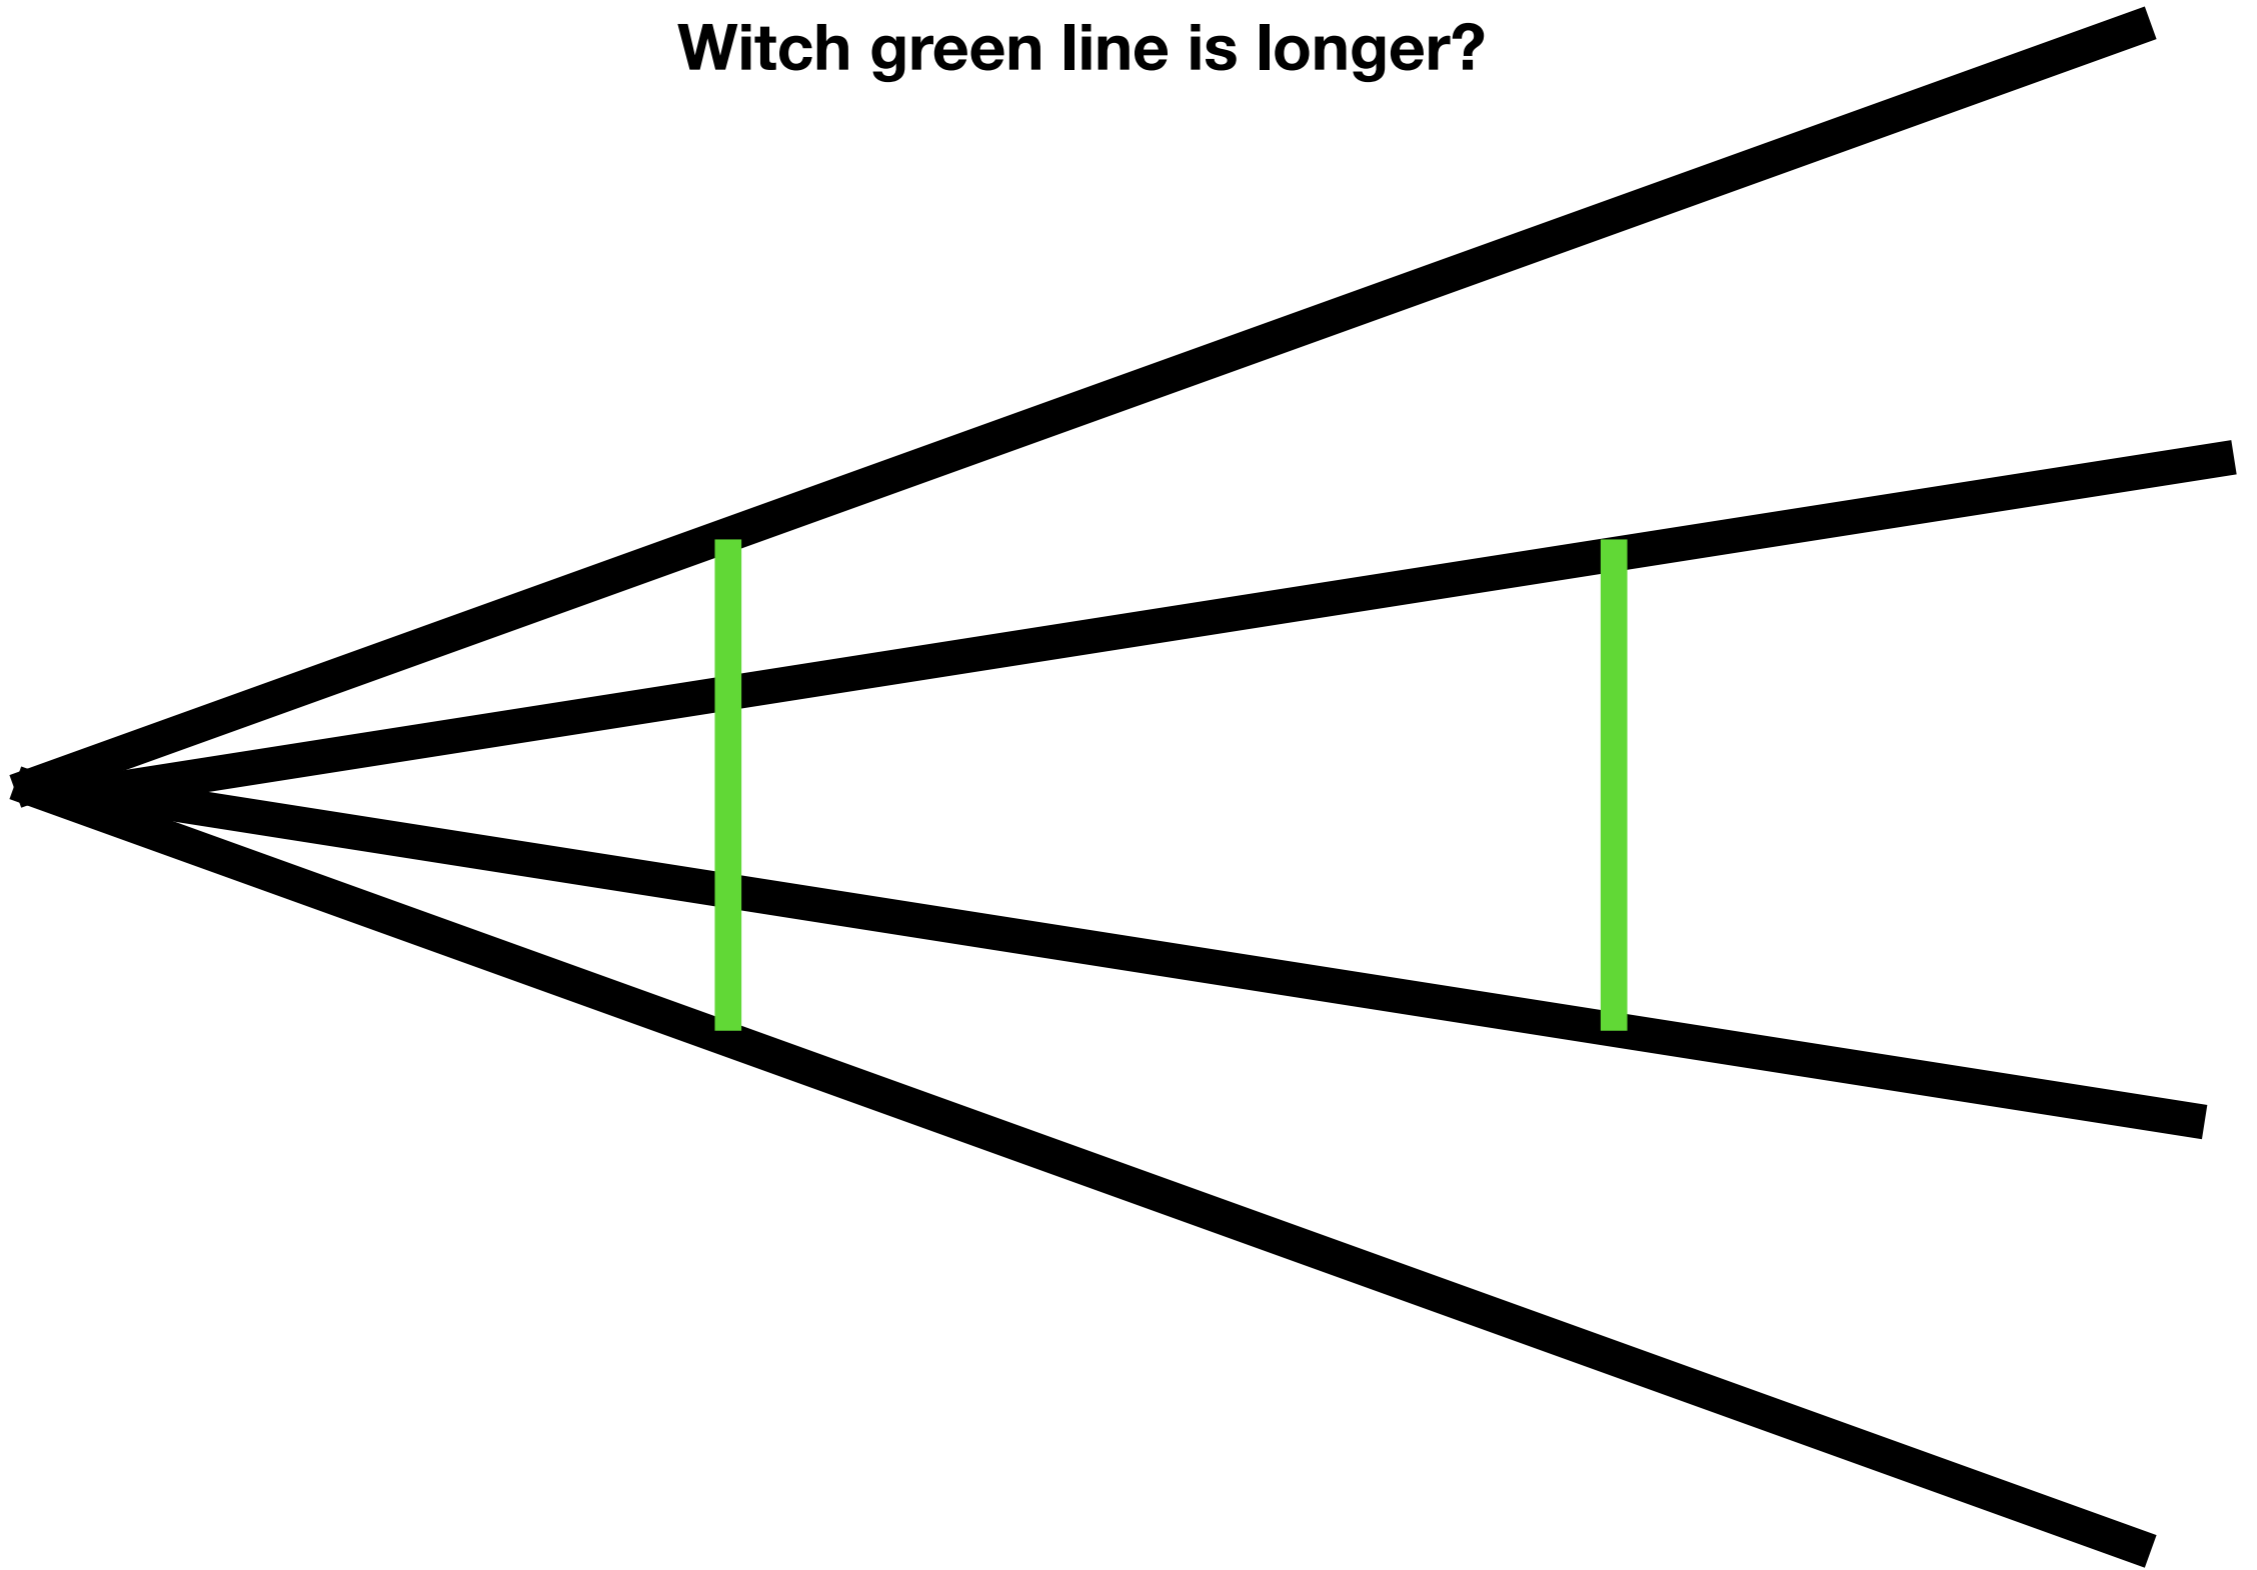

Up or down?

Shirts, anyone?

Which green line is longer?

See you at
howtodostuffwithethan.com

Thx for reading!
